THE COVER

Practical training in
School of Medical Tech-
nology. Story on page 4.

Architect's rendering of addition to
Presbyterian-St. Luke's on West
Harrison Street. First stage of build-
ing, as outlined in photograph, is un-
der construction and will be known
as The Jelke Memorial Building.

1960 BEGINS

—with a \$1,000,000 Gift

On the threshold of the New Year, Presbyterian-St. Luke's Hospital received a \$1,000,000 gift from John F. Jelke, Jr., retired Chicago manufacturer, contributed in memory of Mr. Jelke's parents, John F. Jelke, a pioneer in the oleomargarine business, and Louanna Frazier Jelke.

This gift will be used toward the construction of the Medical Science Research Building now being erected on Harrison Street.

The building, to be named The Jelke Memorial Building, eventually will consist of fifteen floors, a basement and sub-basement. Final plans for the first and second floors have not yet been determined. Floors three, four and five will be occupied by clinical and research laboratories; the sixth floor will house eight additional operating rooms; floor seven will contain observation galleries, seminar rooms and locker rooms for the Department of Surgery. The Departments of Microbiology and Pathology will occupy the eighth floor; mechanical equipment for the building

will be installed on nine; and floors ten through fifteen will provide patient units.

The first eight floors are scheduled for completion and occupancy in June of 1960, and the construction program has been extended to include three more floors, thus providing urgently needed minimal care beds for patients requiring little or no nursing care. Should additional funds become available it is highly desirable and far cheaper to complete the entire fifteen floors during the present building schedule. Therefore, the Trustees are endeavoring to attract further substantial contributions to the hospital.

The building's structural framework is reinforced concrete. The exterior will be of glass and precast concrete. The glass, supported by steel window frames, will be heat absorbing and glare reducing.

The Jelke Memorial Building is the first stage of a much larger structure which will extend the full length of the hospital properties on Harrison Street from Paulina to Wood Streets.

In his desire to memorialize his distinguished father and mother and through his great generosity and civic interest, John F. Jelke, Jr. has made it possible for the hospital to take a big step forward in this new year toward the attainment of its ultimate development program.

NEW FORMULA ROOM

—to provide the
utmost precaution in the
preparation of infants' milk

Left to right: Mrs. Allin K. Ingalls, Mrs. Burton W. Hales, Mrs. Clyde E. Shorey and Mrs. Charles Balfanz, all past-presidents of the Presbyterian Woman's Board who served as the Board's 75th Anniversary Fund Committee, which undertook the financing of the new Formula Room.

Located in the basement of the old Pavilion Building in close proximity to the central kitchen and service elevators, the new Infants' Formula Room is maintained under the strictest supervision of the Departments of Food Service and Nursing.

Costing approximately \$22,000, this Room was the final gift to the hospital of the Presbyterian Woman's Board in honor of the Board's 75th Anniversary.

In the construction of the unit certain physical requirements were essential to assure the safest and most sanitary conditions. Walls and floors are completely tiled; a wall partition, with a large window, separates the Wash Area from the Preparation Area; and a double-door autoclave is accessible to both areas for sterilization purposes.

Modern equipment was installed to further maintain the highest standards of sanitation: an electric bottle washer; electric jet rinser; automatic nipple washer; sanitary blender; mixer-dispenser; two-burner sanitary hotplate; stainless steel counters and cabinets; and scrub sinks for personnel.

Over 500 bottles of infant formulas are prepared and delivered daily to the Pediatrics Department and to the nurseries. With such a tremendous volume of activity, extreme care had to be taken in the planning, construction, and equipping of this Formula Room.

In addition to the Presbyterian Woman's Board gift, a generous bequest by the late Jessie McLaren Simpson in memory of John McLaren Simpson, Jr. enabled the hospital to establish a fund for the maintenance and operation of the Formula Room.

Looking through window from Wash Area into Preparation Area where aide, right, and graduate nurse prepare over 500 bottles of formulas daily.

Attendant in Wash Area washes bottles, returned from pediatrics and the nurseries, with aid of electric bottle washer and jet rinser. Bottles are then placed in autoclave to be sterilized and removed by aide in Preparation Area.

Graduate nurse in Preparation Area loads prepared formulas into double-door autoclave for final sterilization before delivery to pediatrics and nurseries.

SCHOOL OF MEDICAL TECHNOLOGY

—an educational program vital to the medical profession

For many years there has been an acute shortage of adequately trained medical technologists—technicians who, by education and training, are capable of performing various chemical, microscopic, bacteriologic and other medical laboratory procedures used in the diagnosis, study and treatment of disease.

Today this shortage still exists even though more and more approved Schools of Medical Technology are becoming available to those young people interested in this relatively new and rewarding profession.

Through its School of Medical Technology, approved by the Council on Medical Education and Hospitals of the American Medical Association and by the American Society of Clinical Pathologists, Presbyterian-St. Luke's is helping to alleviate the shortage of registered medical technologists.

Under the direction of Dr. Frederick C. Bauer, attending pathologist, the School has a current enrollment of twelve students. During their eighteen-month educational program they receive preliminary training in laboratory procedures and techniques and practical training in bacteriology, hematology, urinalysis, serology, blood bank, histology, chemistry and other subjects necessary to their training.

Students attend bi-weekly lectures and in addition, to enable them to understand the principles behind the laboratory procedures they are learning to perform, they are required to attend hospital conferences in medicine, surgery, and pathology.

Requirements for admission to the School are a high school diploma and two years of college, with biology and chemistry included in the curriculum. By 1962, however, three years of college will be required for admission to an approved school.

Upon graduation from the School, students must take the Board of Registry examination to be certified as a registered medical technologist. In 1959, Presbyterian-St. Luke's School of Medical Technology graduated ten students—a large class for schools of this type.

On her first day, Joan DeCherrie discusses her program with John Haverman, assistant director of the School.

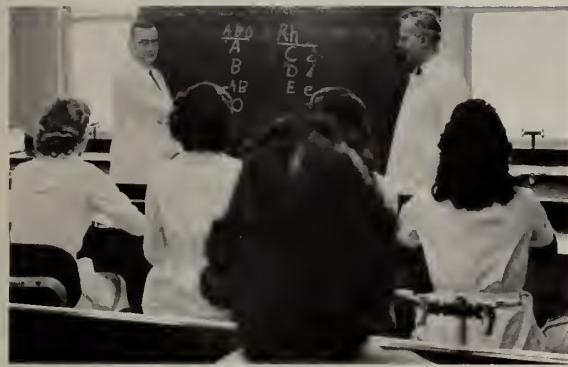

Few people realize how much medical technologists contribute to the work of physicians and research scientists and aid the clinical pathologists in the diagnosis of illness.

In the early days of the clinical laboratory, pathologists performed their own laboratory tests. However, as the science of laboratory medicine progressed, the pathologists found it necessary to train assistants to help perform the simpler tests. Thus the profession of medical technology originated. In 1928, aware of the need for standardization of laboratory technician training, the American Society of Clinical Pathologists established the Registry of Medical Technologists as the only authoritative qualifying body for the field. Through the years, educational requirements to enter approved Schools of Medical Technology have gradually been raised and the standardized training program broadened and improved.

Today the status of the medical laboratory worker has been elevated to a high professional level and the registered medical technologist serves as a significant member of the total health team.

A BRIEF LOOK INTO A MEDICAL TECHNOLOGY

STUDENT'S 18-MONTH EDUCATIONAL PROGRAM

In the School's laboratory-classroom facilities students receive preliminary training in laboratory procedures and techniques from Dr. Frederick C. Bauer, left, attending pathologist and director of the School, and John Haverman.

In the urinalysis laboratory Virginia Cerf instructs Joan in microscopic examination techniques.

In the electrophoresis laboratory student assists Israel Zayas in preparing a specimen for analysis.

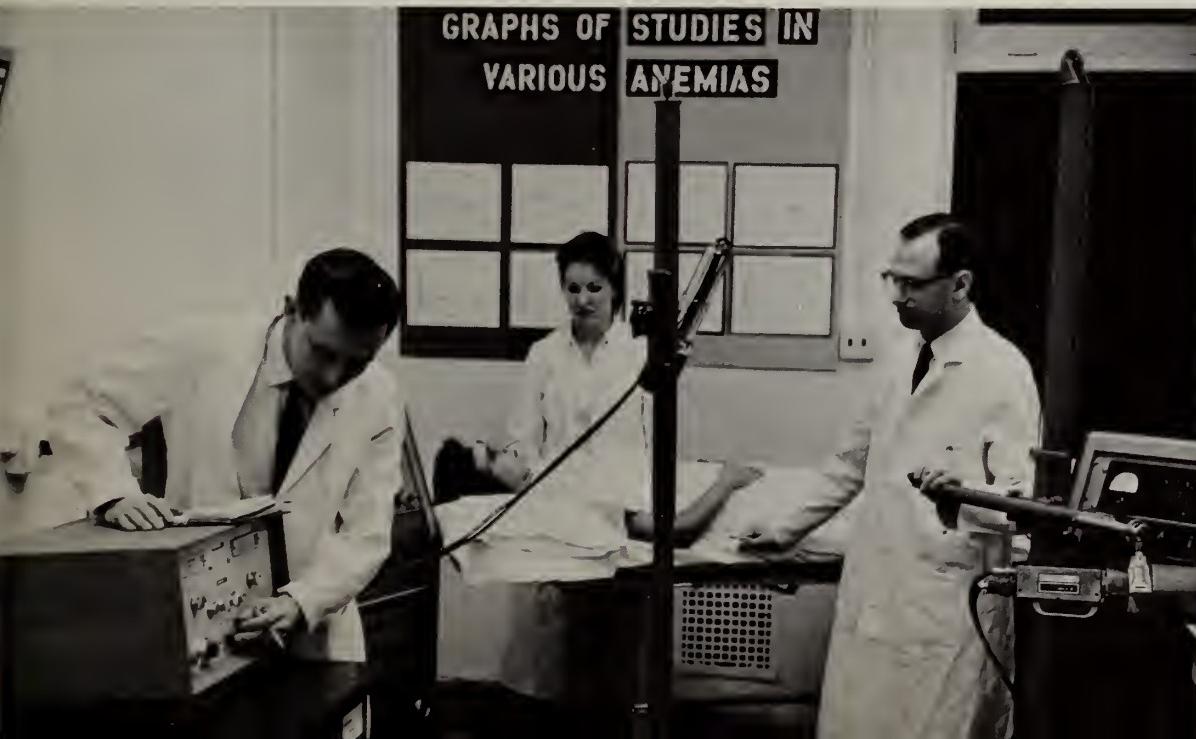

PRACTICAL TRAINING IN HOSPITAL LABORATORIES UNDER THE SUPERVISION OF QUALIFIED PERSONNEL

Mary Robertson supervises Joan in use of calculator to record statistical results in metabolic research.

In the isotope laboratory student observes as William Blask and Dr. Alexander Manuelli prepare to treat a patient.

GRAPHS OF STUDIES IN VARIOUS ANEMIAS

Patients
in these pictures
modeled by
hospital personnel

In bacteriology Ann Renninger instructs Joan in the examination of culture plates.

In histology laboratory Marianne Hidvegi demonstrates the very tedious technique of cutting and preparing surgical tissues for examination.

Periodic conferences are held with a teaching supervisor, Jacqueline Stephens.

Students attend bi-weekly lectures. Here Dr. Frank A. Trobaugh, Jr., director, Department of Hematology, lectures on hematology, the study of blood.

In the blood bank, Joan draws blood from a donor under the supervision of Joan Claring.

PREPARED FOR PATIENT

The Department of Biochemistry has a laboratory for the exclusive use of medical technology students. Here Dr. John Kachmar and Joan discuss chemical analysis of blood and body fluids.

Dr. Gordon Stewart, acting chairman, Department of Biochemistry, demonstrates some of analytical equipment.

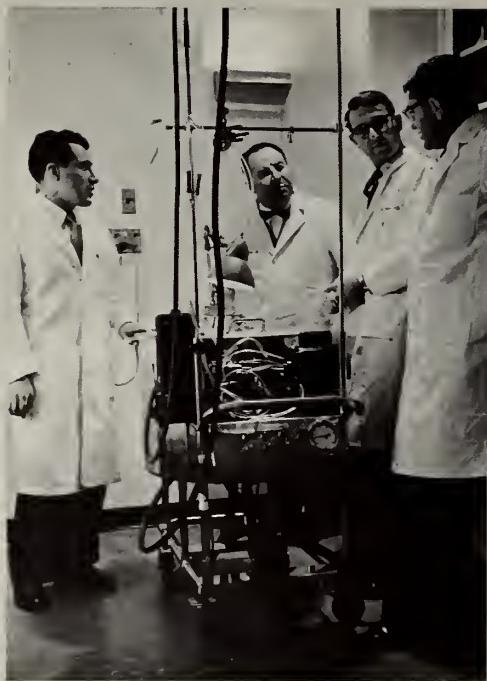

Now, adequately trained in blood count techniques, Joan has her first contact on her own with a patient in the hospital. This is only the beginning of the many direct patient contacts she will have, in addition to her vital work in the laboratory, as a registered medical technologist.

And in the Clinic, Judy Pullen supervises student as she draws blood count from a clinic patient.

MEDICAL

Artificial Kidney Machine and members of the "treatment team." Left to right: Dr. Homero Silva, American College of Physicians Research Fellow, from Lima, Peru; Dr. Robert M. Kark, attending physician; Dr. John Goldsmith, Research Fellow, Department of Medicine, from the University of Sheffield, England; and Dr. Robert C. Muehrcke, assistant attending physician. (Fifth member of the team, Dr. James Lawrence, Research Fellow, from the University of Adelaide, Australia, not shown.)

The Kolff Disposable Kidney, a gift to the hospital from Dr. Ralph Falk, is used for the treatment of patients with acute failure of kidney function.

Poisonous substances in the patient's blood are washed out of the coil located in the center of the tub, which resembles a washing machine. Blood going into the coil leaves the patient from an artery and is returned to the patient through a vein.

This process tides the patient over until the kidney can start functioning again. One patient can receive as many as four treatments.

Before this machine was put into use, the hospital's Research and Education Committee sent Dr. John Goldsmith to the Cleveland Clinic Foundation. There he was trained for three months in the operation of the Kolff Disposable Kidney by its inventor, Dr. Willem Kolff.

In addition to the regular members of the "treatment team," a medical resident, as part of his training, and a graduate nurse from Intensive Therapy, where the machine is located, always serve on the team.

Drs. Edward Allen and Harry Boysen attended the Obstetrical and Gynecological Travel Club meeting in Toronto in late November.

"Radiation Cataract in Animals" was Dr. D. V. L. Brown's paper presented at a Symposium on the "Delayed Effects of Whole Body Radiation." Held in October, the Symposium was sponsored jointly by Walter Reed Army Institute of Research and the Operations Research Office, Johns Hopkins University. Dr. Brown has been Certified by the American Board of Ophthalmology.

Dr. Richard B. Capps presided at the annual meeting of the American Association for the Study of Liver Disease held at The Drake Hotel in early November. Dr. Capps was President of the Association last year.

SURGEONS MEET AT HOSPITAL

Approximately 300 members and guests of the Central Surgical Association attended an "Invitation Clinic Day" at Presbyterian-St. Luke's on February 18. This Clinic Day, under the chairmanship of Dr. Edward J. Beattie, Jr., Chairman of the hospital's Department of Surgery, was a part of the Association's annual meeting held at The Drake Hotel. Dr. E. Lee Strohl, attending surgeon, served as Chairman of the Arrangements Committee for this 17th Annual Assembly.

The surgeons attended operative clinics in the hospital operating rooms from 8 until 10 a.m. and from 10:30 until noon a scientific program was presented in the A.B. Dick Lecture Room. At noon the visitors gathered in the School of Nursing for a buffet luncheon.

Dr. R. K. Gilchrist, attending surgeon, served as president of the Association in 1952-53. Sixty-three Chicago area surgeons are members of the Central Surgical Association, twenty-seven of whom are on the Presbyterian-St. Luke's Medical Staff.

OTHER SOCIETY MEETINGS

In November, the semi-annual meeting of the Central Electroencephalographic Society was held at Presbyterian-St. Luke's. An all-day meeting, the scientific program was held in the A. B. Dick Lecture Room. Hosts for the meeting were Dr. Frederic A. Gibbs, attending neuropsychiatrist, Dr. John S. Garvin, associate neuropsychiatrist, and Dr. Pauline M. Cooke, assistant neuropsychiatrist.

On January 24, approximately 100 members of the Chicago Chapter, Society of Nuclear Medicine attended an evening meeting in the Lecture Room and toured the X-ray Department. Dr. Fay H. Squire, Chairman, Department of Radiology, served as host.

And, on January 27, the Illinois Chapter, American Association of Inhalation Therapists held their annual meeting at the hospital. Dr. Albert H. Andrews, Jr., Director, Department of Inhalation Therapy, and Dr. Paul W. Searles, Chairman, Department of Anesthesiology, participated on the program. Both Drs. Andrews and Searles serve on the National Board of Advisors of the Association and Dr. Searles is medical advisor to the Illinois Chapter.

In mid-November, Drs. Paul W. Greeley, Gerald O. McDonald,

STAFF ACTIVITIES

Harry W. Southwick, Hushang Javid, William S. Dye and Burton C. Kilbourne attended the annual meeting of the Western Surgical Association in Colorado Springs. Dr. McDonald presented a paper on "Wound Irrigation in Cancer Surgery;" Dr. Southwick spoke on "Elective Neck Dissection for Intraoral Cancer;" Dr. Javid's paper was entitled "Surgical Management of Cerebral Vascular Insufficiency;" and Dr. Dye's subject: "Successful Treatment of Portal Vein Thrombosis Associated with Intra-Hepatic Obstruction" (co-authors: Drs. Douglas David and Ormand Julian).

At Northwestern University recently, Dr. Dye lectured on "History of Vascular Surgery."

Early in December, Drs. McDonald, *R. K. Gilchrist, Geza deTakats* and *Edward J. Beattie, Jr.* attended the Southern Surgical Association meeting in Hot Springs.

Also in December, Dr. deTakats presented a paper before the Chicago Surgical Society entitled "Intermittent Claudication."

In January, Dr. Gilchrist lectured before the Billings Medical Club on "Hyperthermia in the Treatment of Cancer." In February, *Dr. Harry F. Dowling* spoke to this Club on "The Common Cold."

Dr. Dowling was in New York in January for a meeting of the American Trudeau Society's Committee on Research in Acute Respiratory Infections.

At the Palmer House in December, *Dr. Clark W. Finnerud* presented a lecture on "Radiodermatitis and Cancer," illustrated with colored slides, before the American Academy of Dermatology and Syphilology. At this same meeting, *Dr. Adolph Rostenberg, Jr.* spoke on "Predictive Procedures for Eczematous Sensitizations" and "Antigen-Antibody Reactions and Inflammation." Also, he moderated an informal discussion group on "General Aspects of Dermatology."

Dr. Ormand C. Julian lectured on "New Frontiers in the Care of the Cardiac Patient—Heart Surgery Specifically" at the Chicago Heart Association Nurses Workshop held at the Morrison Hotel in November. In January, Dr. Julian spoke on "New Trends in Vascular Surgery" before the Bureau County Medical Society in Spring Valley, Illinois.

Dr. Hiram T. Langston attended the American Association for Thoracic Surgery's Program Committee meeting in St. Louis in January; and also, the American College of Surgeons' Sectional Meeting in Louisville, Kentucky. At the latter meeting, Dr. Langston participated on two panels, one on "Trauma" and the other on "Cytology in Surgery."

In January, *Dr. Paul H. Holinger* was in Syracuse, New York, to present a paper on "Endoscopic Aspects of Tumors of the Lower Respiratory Tract" before the Central New York Eye, Ear, Nose and Throat Society. From there, Dr. Holinger went to Pittsburgh where he presented a paper entitled "Laryngeal Trauma in Industry" before the Pittsburgh Otolaryngological Society.

NEW CLUB FORMED

A new organization—The Research Club—has been established at Presbyterian-St. Luke's to acquaint the hospital community with the research effort of the hospital.

The Club's first meeting was held on January 12 in the A. B. Dick Lecture Room. The meeting was open to the entire Presbyterian-St. Luke's community as well as to medical students and others from the University of Illinois.

This first forum included presentations of research work on the treatment of cancer of the breast; and a discussion on the development of the heart changes in dogs similar to those which occur after heart attacks in humans.

Dr. Edward J. Beattie, Jr., Chairman, Department of Surgery, and Dr. Robert W. Carton, assistant attending physician, are co-chairmen of the new Club's Program Committee.

In mid-February, *Dr. Warren H. Cole* served as Visiting Professor at Baylor University, Houston, Texas.

The Milwaukee Ophthalmological Society recently heard *Dr. William F. Hughes* deliver a paper on "Corneal Dystrophies and Their Treatment by Corneal Transplantation;" and in Indianapolis early in February he spoke on "Management of Uveitis" at a meeting of the Indianapolis EENT Society.

In January, *Dr. Howard L. Wilder* presented a paper, "Irregular Grafts of Cornea and Sclera," before the Chicago Ophthalmological Society. In February, *Dr. Edward E. Pushkin* attended this Society's Clinical Conference at The Drake Hotel.

Dr. Karl Scheribel attended a recent Ophthalmological Seminar at the University of Florida, and very recently was in New Orleans for the 10th Annual Session of the New Orleans Academy of Ophthalmology.

In mid-February, *Dr. George P. Guibor* attended the Wilmer Ophthalmological Institute in Philadelphia.

"Hyperparathyroidism in a Patient with Arthritis" was the title of *Dr. Eugene F. Traut's* paper presented at the December meeting of the Chicago Orthopaedic Society.

At the American Academy of Orthopaedic Surgeons annual meeting held at the Palmer House in late January, *Dr. Charles V. Heck* presided as General Chairman. *Dr. Claude N. Lambert* also attended this meeting and served as a member of the examining board of the American Board of Orthopaedic Surgeons.

In February, Dr. Lambert was in Houston, Texas, where he lectured on "Hand Injuries" and "Juvenile Amputees" at the Law Science Institute, University of Texas.

Dr. Charles K. Wolfe, Jr. was a member of two panels on "Infections" and "Antibiotics" at the October meeting of the North Central Section, American Urological Association, Inc., held at The Drake. Early in October, *Dr. Carl Davis, Jr.* discussed "Kidney Transplants" before the American Urological Association.

ELECTIONS AND APPOINTMENTS

Dr. Burton C. Kilbourne, Member, Advisory Committee, Rehabilitation Institute of Chicago.

Dr. Geza deTakats, Vice President, Chicago Heart Association.

Dr. John S. Graettinger, President, Board of Directors, Bishop Anderson House; and Member, Society of Clinical Research.

Dr. Edwin C. Graf, President-Elect, North Central Section, American Urological Association, Inc.

Dr. Samuel G. Taylor, III, Member, Medical and Scientific Committee, Illinois Division, American Cancer Society; Member, Professional Education Committee, American Cancer Society; and Editorial Board, Year Book of Cancer.

Dr. E. Lee Strohl, President, Board of Directors, Municipal Tuberculosis Sanitarium.

Drs. Strohl, Edward J. Beattie, Jr. and William J. Grove, Members, Alpha Omega Alpha, National Medical Honor Society.

Dr. Harry F. Dowling, Member, Editorial Board of "Chemotherapy;" Editor, "Disease-a-Month" publication; and Member, Council on Drugs, American Medical Association.

Dr. Paul H. Holinger, President, forthcoming Pan American Congress of Otolaryngology and Bronchoesophagology.

Dr. Roland P. Mackay, Chairman, Medical Advisory Board, National Multiple Sclerosis Society.

Dr. Edwin F. Hirsch, President, Chicago Pathological Society.

Dr. Adolph Rostenberg, Jr., Member, Training Grant Committee, National Institute of Allergy and Infectious Diseases, National Institute of Health.

Dr. Matthew Lewison, Associate Professor of Pediatrics, University of Illinois.

At the Arizona Regional Meeting of the American College of Physicians held in December in Tucson, Dr. Howard Wakefield presented two papers entitled: "Heart-Gall Bladder Problems" and "Experimental and Clinical Observations."

Left to right: William Blask, research technician, Dr. George W. Stuppy, Dr. Frank E. Trobaugh, Jr., Dr. Willard L. Wood, and Patricia Pierce with Presbyterian-St. Luke's exhibit, which was on display at the Arthritis and Rheumatism Foundation's recent "Arthritis Research Exhibit" in the Conrad Hilton Hotel.

This exhibit was one of nine arthritic research projects exhibited that the Foundation's Illinois Chapter is supporting. Under the direction of Dr. Trobaugh, head of the hospital's Department of Hematology, the purpose of this particular research project is to study the anemia of rheumatoid arthritis and its relation to the abnormal proteins found in the blood of patients with rheumatoid arthritis.

In early November, Dr. Samuel G. Taylor, III spoke on "Pitfalls in Evaluating Present Status in Disseminated Cancer of the Breast" before the St. Louis Surgical Society. Also in November, Dr. Taylor attended a Medical Advisory Committee meeting of the Cancer Control Program of the U.S. Public Health Service in Washington.

Dr. E. Lee Strohl was in Kansas City in November to speak on "The Costs and Methods of Financing Chronic Illness in the Aged Patient" at the American Medical Association Regional Conference on Aging.

In October, Dr. Harold H. Steinberg addressed the Medical Staff and Residents of the Menninger Foundation School of Psychiatry in Topeka. His subject: "Evaluating the Emotional Health of Industrial Workers." In November, Dr. Steinberg participated in a panel discussion before the North Shore Committee for the Older Adult held in Winnetka, Illinois. The subject: "Physical and Emotional Health in the Second Forty Years—What to do about it."

At the American Hospital Association Institute on "Hospital Design and Construction" held in December, Dr. Alfred P. Solomon spoke on "Meeting the Needs for Psychiatric Facilities."

Also in December, Dr. Solomon attended a meeting of the Liaison Committee of the American Hospital Association and the American Psychiatric Association in Washington, D.C.

COLEMAN MEDAL TO DR. HIRSCH

At the annual meeting of the Institute of Medicine of Chicago on January 14, Dr. Edwin F. Hirsch, consulting pathologist, was awarded the George Howell Coleman Medal for his "outstanding contribution to the welfare of the community above and beyond the practice of his profession."

This prize, presented annually by the Institute to a Chicago physician, was established in 1957 to honor Dr. George H. Coleman, consulting physician, for his meritorious service to all things worthwhile in medicine in Chicago. The medal was awarded to Dr. Coleman in 1958.

Early in December, Dr. Francis J. Gerty was in Baltimore where he read a paper, "Rival Psychotherapies," before the Maryland Psychiatric Association, and from there he went on to New York to attend the meeting of the American Board of Psychiatry and Neurology.

Dr. Danely P. Slaughter was in Guadalajara, Mexico, in November where he lectured on "Newer Concepts in Cancer Management" before the Medical Assembly of the West held at the University of Guadalajara Medical School.

"The Hypoglycemic Effect of L-Leucine in Organic Hyperinsulinism" was the title of Dr. Theodore B. Schwartz' paper presented before the Central Society for Clinical Research meeting held at The Drake in November. In January, Dr. Schwartz was in Los Angeles to speak before the American Diabetes Association meeting on "Diabetes and Basic Metabolic Problems."

In January, Dr. Oglesby Paul lectured on "Selection of Patients with Rheumatic Heart Disease for Surgery" at a

SYMPOSIUM OF INTERNATIONAL IMPORTANCE

The internationally known British scientist and Nobel Prize winner, Sir Hans Krebs, M.D., F.R.S., F.R.C.P., will be special guest speaker at the First Ames Symposium, "Ketosis," to be held at Presbyterian-St. Luke's on March 2. (Ketosis is the abnormal accumulation of Ketone bodies which arise from the normal breakdown of fat in the body.)

The Symposium, which will include talks by leading specialists on "Ketosis" from across the country, is being held under the joint auspices of Presbyterian-St. Luke's and Ames Company, Inc., of Elkhart, Indiana.

In the evening at The Drake Hotel, Dr. Krebs will deliver the first Dr. Joseph P. Ross Lecture of the Ames Symposium. (Dr. Ross, in whose honor this lecture has been named, was the founder of Presbyterian Hospital.) Dr. Krebs, famed as discoverer of the Krebs Cycle, is Whitley Professor of Biochemistry, Oxford University, and was Nobel Laureate in 1953. The title of his lecture, to be delivered in The Drake's Ballroom, is "The Biochemical Lesion in Ketosis."

Other Symposium speakers will include: Dr. Robert H. Williams, Professor of Medicine and Executive Officer, Department of Medicine, University of Washington (Seattle); Dr. Robert E. Johnson, Professor of Physiology, University of Illinois, College of Liberal Arts and Sciences (Urbana); Dr. William Daughaday, Associate Professor of Medicine, Washington University, and Assistant Attending Physician, Barnes Hospital (St. Louis); Dr. Allan M. Butler, Professor of Pediatrics, Harvard University, and Pediatrician in Chief, Massachusetts General Hospital (Boston); Dr. Marvin D. Siperstein, Assistant Professor of Internal Medicine, Department of Medicine, University of Texas, Southwestern Medical School (Dallas).

Hosts for the Symposium and lecture are: Dr. James A. Campbell, Chairman, Department of Medicine, Presbyterian-St. Luke's, and Professor of Medicine, University of Illinois; and Dr. Kenneth Carter, Vice President, Research and Medical Affairs, Ames Company, Inc.

Post Graduate Course held at the University of Kansas Medical School. Later in the month, Dr. Paul spoke at Michael Reese Hospital. His subject: "Long Term Study of Coronary Heart Disease."

Dr. Roland P. Mackay was in New York in December for meetings of the American Epilepsy Society and the Association for Research in Nervous and Mental Disease. In February, Dr. Mackay was in Indianapolis where he spoke before the Indiana Neuropsychiatric Association. His subject: "The Neurology of Motivation."

Johannes L. Koppel, PhD. presented a paper entitled "Observations on Components of the Plasma Clearing System" (co-authors: Drs. Lillian V. Novak and John H. Olwin) at the meeting of the American Society for the Study of Arteriosclerosis in Chicago in November.

PHOTOGRAPHY AWARD TO DR. HOLINGER

At the annual meeting of the Biological Photography Association in Montreal, Dr. Paul H. Holinger, attending bronchoesophagologist, received the Association's Louis Schmidt Award presented to one individual annually for "outstanding contributions to medical and biological photography."

Dr. Holinger received the 1959 award for his work in bronchoscopic photography.

"Treatment of Metastatic Tumors of the Lung" was *Dr. Robert J. Jensik*'s paper presented before a recent meeting of the Peoria Medical Society. In November, Dr. Jensik was in Washington, D. C., to attend the Adjuvant Chemotherapy Program meeting.

On November 12, *Dr. R. Lincoln Kesler* appeared on Radio Station WAIT to help promote Diabetes Detection Week, sponsored by the Chicago Diabetes Association, of which Dr. Kesler is Vice President.

Dr. Digby G. Seymour has been Certified by the American Board of Anesthesiology.

In November, *Dr. Stanton A. Friedberg* moderated a panel, "Emergencies in Otolaryngology," at the meeting of the Chicago Laryngological and Otological Society held in the Furniture Club of America.

In early February, *Dr. Robert A. Beebe* attended the 4th Illinois Congress of the Illinois Committee for Maternal and Infant Health. Dr. Beebe was General Chairman for this meeting held in Peoria, Illinois.

In November, *Dr. Steven G. Economou* attended the National Cancer Chemotherapy Congress in Washington, D.C. And in mid-January, Dr. Economou spoke before the Salt Lake County Medical Society, Salt Lake City, Utah, on "Cancer Dissemination and its Control."

In late October, *Dr. A. Beaumont Johnson, II* was in Miami to attend the Congress of Neurological Surgeons. He was appointed Chairman of the Arrangements Committee for the Congress' meeting in Chicago this year.

Dr. David Baldwin was in Philadelphia in mid-December to attend a Symposium on "Edema."

NEWS BRIEFS

NEW CONTROLLER APPOINTED

The Board of Trustees has appointed John R. Walsh Controller of Presbyterian-St. Luke's Hospital. Mr. Walsh replaces Earl Soder, who had been with the hospital since April, 1958 on a loan basis from Arthur Andersen & Co.

Mr. Walsh recently served as Controller of the Crane Company's manufacturing activity in Chicago, and prior to that as Studebaker-Packard Corporation's Assistant Controller.

FORM MEDICAL STAFF AUXILIARY

Members of the former Presbyterian Doctors Wives and the former Women's Auxiliary to the St. Luke's Medical Board have now merged into a new organization, The Medical Staff Auxiliary. The Auxiliary, whose membership is composed of wives of Presbyterian-St. Luke's doctors, will function as an auxiliary to the Woman's Board and primarily will be a service organization.

At its first meeting, The Medical Staff Auxiliary elected the following officers:

Mrs. Fred Shapiro, President
Mrs. Eugene A. Edwards, 1st Vice President
Mrs. Thomas J. Coogan, 2nd Vice President
Mrs. Edwin N. Irons, Recording Secretary
Mrs. Edwin C. Graf } Corresponding
Mrs. Edward A. Pushkin } Secretaries
Mrs. Theophil P. Grauer, Treasurer
Mrs. William F. Hughes, Jr., Assistant
Treasurer
Mrs. William H. Highstone } Members-at-
Mrs. George W. Stuppy } Large

GIFT TO MEDICAL RECORDS

As its final gift to the hospital, the Women's Auxiliary to the St. Luke's Medical Board has provided funds in the amount of approximately \$18,500 to aid the Medical Records Department in establishing a centralized

Missal and missal stand presented to the Chapel by the faculty of the School of Nursing in honor of Mrs. Frank P. Hixon.

medical records system and to help make the department more functional.

New equipment, such as shelving, elevator files, and additional IBM typewriters and transcribers, is being purchased with these funds.

MRS. HIXON HONORED

At a special service in the Hospital Chapel, the faculty of the School of Nursing presented a missal and missal stand to the Chapel in honor of Mrs. Frank P. Hixon, retiring Chairman of the Nursing Council.

In 1943, Mrs. Hixon became Chairman of the St. Luke's Nursing Council and subsequently Chairman of the Presbyterian-St. Luke's Nursing Council. Her interest in and contribution to the welfare and education of nurses, students and graduates, have been outstanding.

The purpose of the Nursing Council is to assist the School of Nursing Administration by working with many School activities and

In the Chapel, The Rt. Rev. Charles L. Street, right, a member of the Clerical Board, assisted by Chaplain William Wagner, dedicates chalice, presented to the School of Nursing by the St. Luke's Class of 1934.

to work closely with the Nursing Committee of the Board of Trustees. Mrs. Charles H. Morse, Jr. is the new Chairman of the Council.

HOSPITAL HOBBY SHOW

On February 9, 10, and 11 a total of 80 employees, attending staff, house staff and student nurses exhibited their hobbies in Presbyterian-St. Luke's Second Hobby Show held in the School of Nursing.

Exhibits included a wide variety of collections from Turkish brass to live turtles; paintings; photography; handmade dolls; block printing; miniature gardens; metal work; model ships and trains; a bridge of matches; various textile arts—and many more.

Art Editors from the Chicago newspapers served as judges and awarded ribbons in each of five categories.

Visitors to the Show had an opportunity to win one of two door prizes—gift certificates from the hospital's Gift Shop.

AN URGENT CALL FOR MORE PEOPLE TO WEAR THIS EMBLEM

—the emblem of the Presbyterian-St. Luke's Volunteer

With the expansion of the hospital and hospital administration's 100% support of its volunteer program, there is a desperate need for volunteers in all areas of the hospital.

For information, write or call: Volunteer Service Office
Presbyterian-St. Luke's Hospital
1753 West Congress Parkway
Chicago 12, Illinois
SEeley 8-4411, Extension 2279

the new year also brings—

SCHOOL OF NURSING ACCREDITATION

In January, 1960, Miss Edith D. Payne, Director of the Nursing Department, received official notification that the National League for Nursing had accredited the "Education and Nurse Internship" program offered by the Presbyterian-St. Luke's Hospital School of Nursing.

Accrediting representatives (Frances K. Peterson, Assistant Director, Department of Diploma and Associate Degree Programs, and Mildred S. Schmidt, Nurse Consultant to Associate Degree Programs) visited the School in mid-October, 1959 and submitted a report of their evaluation of curriculum, faculty, physical facilities, clinical resources, nursing service, etc. to the Board of Review of the National League for Nursing.

The education and internship program (first offered in September, 1957) was developed by the faculty of the Presbyterian and the St. Luke's Hospital Schools after the corporate merger of the hospitals in April, 1956. During the first two years, the student learns to give nursing care by acquiring and applying skills and knowledge of nursing, physical sciences, social science, psychiatry and communication in selected, patient-centered experiences in the hospital. In the third year, the student practices her profession as a salaried Nurse Intern.

There are 169 nurse interns, 142 junior students, and 137 freshmen currently enrolled in the School. The total of 448 nursing students makes the Presbyterian-St. Luke's Hospital School of Nursing one of the largest in the United States and the largest in the City of Chicago.

SERVICES

dispensing over 1700 items daily

Presbyterian-St. Luke's new pharmacy embodies every function of pharmacy service that is found in the modern "apothecary shop" as well as the additional services that are required to operate a modern hospital pharmacy.

The Department of Pharmacy Services occupies space on the first floor and on the ground floor of the hospital. A staircase and dumbwaiter within the department serve as connecting links between the two floors. The first floor consists of a waiting room, the Dispensing Area, and an office. The ground floor is occupied by Pharmacy Stores, the Pharmacy Manu-

facturing and Prepackaging Area, and a waiting room for Clinic out-patients.

In the Dispensing Area, prescriptions are analyzed, filled and checked on two production lines: one for hospitalized patients and one for out-patients.

On the out-patient production line, an average of 300 prescriptions is filled daily for private out-patients and clinic out-patients. The cost of free drugs for clinic patients averages \$9,000 each month. Some funds for this free service are provided by the Woman's Board, welfare agencies, and contributions from friends of the hospital.

On the in-patient production line, hospitalized patients' prescription order slips, prepared on the patient floor and picked up by a pharmacy technician, are analyzed at the head of the line, moved along the line for filling and checking, and subsequently end up in the sorting area to be placed in containers for delivery

1

2

7a

to the nursing stations. An average of 700 orders, with two or more prescription items per order, are dispensed to hospitalized patients daily. In emergency cases, orders are brought or telephoned to the pharmacy for immediate processing and delivery.

Eleven sections of shelving, containing all known items of modern drug therapy as well as items manufactured in the pharmacy, are accessible to both production lines. The sections are divided according to type of product: ampule; internal liquid; gastrointestinal; tablet-capsule; external preparation; eye; ear, nose and throat; intravenous fluid; chemical, for compounded prescriptions; sundry and miscellaneous items such as colostomy sets, elastic stockings, eye pads, etc. The shelving is open in design for the most effective work volume and items within each section are arranged alphabetically.

DISPENSING AREA

- 1) Beginning of in-patient dispensing production line.
- 2) Continuation of in-patient dispensing production line.
- 3) Out-patient dispensing production line.
- 4) Sections of shelving accessible to both production lines.
- 5) Section of intravenous fluids with administration sets is readily available in Dispensing Area.
- 6) Tablet-Capsule section. Pharmacist is checking completed in-patient prescriptions.
- 7) Compounding counter.
 - a) Pharmacist is weighing chemical to prepare liquid solution.
 - b) Pharmacist completes powder prescription.
- 8) Prescription filing cabinets holding recent out-patient prescriptions dispensed. Cabinet holds 72,000 prescriptions (in units of 1000 each) which are readily available for referral.

Today, the majority of pharmaceutical items come as finished products in contrast to the days when all medications had to be compounded in the pharmacy. However, modern drug therapy has not completely eliminated the original methods of drug preparation. About 15% of the items required—certain liquids, ointments and mixtures, capsules and powders—still have to be manufactured by the pharmacists. This is done in the compounding section of the Dispensing Area and in the Manufacturing and Prepackaging Area.

Also in the Manufacturing and Prepackaging Area many drugs are prepackaged in standard form and quantity ready for use. This includes items which are stocked on all patient floors such as aspirin, laxatives, mouth wash, lotion, cough preparation, antiseptics; and items prepackaged in ready use units for specialty

areas such as maternity, intensive therapy, operating room, clinic, examining room. A check system of all these service items controls their usage and a perpetual inventory is made by a technician, who replenishes the supply as needed.

In addition, the pharmacy services floors and specialty areas with important and frequently used therapeutic agents, such as intravenous fluids and injectable medications. Thus, these items are immediately available to doctors and nurses at all times.

Through the Pharmacy Stores Area various hospital departments receive certain special items necessary to their operation—chemicals and alcohol for laboratories; anesthetic agents for the Department of Anesthesiology; treatment supplies for Xray, and so on.

The Department of Pharmacy Services is open Monday through Saturday from 8:30 a.m. until 9:00

Louis Gdalman, Director of Pharmacy Services, stands by honorary plaques awarded to him by E. K. Squibb & Sons for having filled 5 million prescriptions in his thirty years of service with the hospital.

p.m. and on Sundays from 9:30 a.m. until 11:00 p.m. In case of emergency during hours the department is closed, the Nursing Department has access to medications.

In addition to Louis Gdalman, Director, the department includes ten registered pharmacists, six apprentices, technicians and clerks, and three part-time technicians.

Mr. Gdalman, who has served the hospital for thirty years, is considered one of the country's outstanding hospital pharmacists. A graduate of the University of Illinois College of Pharmacy, he is a Past-President of the Chicago Branch, American Pharmaceutical Association; Past-President and Charter Member, Illinois Society of Hospital Pharmacists; and Charter Member, National Society of Hospital Pharmacists. He

has served on the Faculty of the American Hospital Association, the American Catholic Hospital Association, and Northwestern University's School of Hospital Administration. Most recently, Mr. Gdalman was invited to participate in the 9th Annual Rutgers Pharmaceutical Conference—a national conference for the entire pharmaceutical profession. At this Conference, he participated in the program as the representative of the nation's hospital pharmacists.

The entire physical layout of the new pharmacy, which maintains an inventory of over 6,000 items, was designed by Mr. Gdalman to incorporate and facilitate systems of production, control, distribution and service developed by him. Many of these systems now are in use in hospital pharmacies throughout the country.

ONE PATIENT'S MEDICATION ORDER

PREPACKAGING AND MANUFACTURING AREA

- 1) Liquid packaging counter.
- 2) Preparation of floor service items.
- 3) Modern equipment is used to prepare bulk liquid items.
- 4) Steam kettles are used in manufacturing large quantities of chemical solutions and pharmaceutical liquid preparations.

Rows of chemicals used in pharmaceutical preparations. Note old-fashioned chemical bottles in modern setting.

- 1) Doctor writes order for medications on patient's chart.
- 2) Nurse transfers order to patient's medication cardex, and subsequently fills out order slip for the Pharmacy.
- 3) Pharmacy technician picks up order slip on his rounds of nursing stations.
- 4) Pharmacist at beginning of production line analyzes order and prepares to dispense medication.
- 5) Order slip moves along production line for filling of additional drugs on slip. (One patient's order often includes two or more prescription items.)
- 6) Filled prescriptions are checked by another Pharmacist.
- 7) Patient's order reaches the sorting table and is placed in a container designated for delivery to the particular nursing station.
- 8) Technician delivers order to nurse on the patient's floor.

LONG RANGE STUDY

After considering proposals from several firms, both local and national, the Board of Trustees has chosen Booz, Allen & Hamilton of Chicago as the management consultants to prepare a long range study of the hospital, its facilities, its future growth and its eventual position in the hospital field. Being a firm with Chicago headquarters and having had broad experience with the problems of voluntary teaching and research hospitals, Booz, Allen & Hamilton seem particularly qualified to assemble the necessary material and make a report that will supplement the so-called "Master Plan" calling for the eventual replacement of all older buildings.

This long range study will represent the combined thinking of the Board of Trustees, the Medical Staff and Administration tempered by the experience of Booz, Allen & Hamilton in other hospital situations. Individual interviews were scheduled with many Board members, with a number of doctors—including all officers and department heads—and with all key administrative personnel. The resultant report, therefore, will be a joint project intended to point the way for the next five to ten years. The objectives of the hospital will be clearly defined but obviously there will be several ways of arriving at the final goal.

As this is written, the finishing touches are being accomplished, after which the report and its conclusions will be presented to the Board of Trustees, Executive Committee of the Medical Staff, the officers of the Woman's Board and to the administrative team.

THERAPY THROUGH FLOWERS

a project with lasting values

An unusual project was launched this year in the Psychiatric Unit's Occupational Therapy Department—weekly Flower Arrangement Classes for patients.

The original idea for the class was initiated by Mrs. Arthur Jongsma, a volunteer who formerly owned a Flower Shop, and developed through the cooperation of Mrs. Edwin W. Metschke, another volunteer who has done this type of work at Hines Hospital; and Mrs. Ruth Curtis, Director of Occupational Therapy.

Fresh flowers, without which the class would be impossible, are donated weekly by Allied Florists, Inc. located on West Randolph Street in Chicago.

According to Dr. Alfred P. Solomon, attending psychiatrist, the Flower Arrangement Class has been

Dr. Alfred P. Solomon looks on as Mrs. Arthur Jongsma, Volunteer, demonstrates corsage designing for Flower Arrangement Class in Psychiatric Unit.

developed "not only as a group activity but as a project which possesses lasting values after the patient leaves the hospital."

Dr. Solomon goes on to say: "Flowers are one of nature's greatest expressions of beauty, and have an appeal to all mankind. In floral arrangement, man's creative urges get an opportunity to design and combine colors. What the patient does is similar to that which the artist engages in in his use of form and color. This feeling of creativity enhances his feelings of self esteem and pride.

"The patients invariably preserve the completed arrangement either for their own use or to later con-

vey tender feelings to a loved one. The experience of these feelings may be an important goal in the patients' psychiatric treatment. Not only are sentimental feelings aroused in the anticipation of the use of the completed arrangement but often significant memories of the past, of this nature, are recalled. Recollections of this type may be useful to the progress of treatment.

"This class is one of the many group activities used in the Psychiatric Unit for the purpose of restoring the feelings of human dignity in those suffering from an illness where these feelings have been temporarily shattered or threatened."

MEDICAL STAFF ACTIVITIES

Dr. William F. Hughes, Chairman of the Department of Ophthalmology, demonstrates a revolutionary device used for treatment of the eye.

This device—a Photocoagulator developed at the University of Bonn, Germany, and costing \$13,000—is one of two such machines in the Chicago area, the other one located at the University of Chicago.

Projected from a Xenon bulb encased in this machine, 3800 watts of light are focused through a specially designed ophthalmoscope, protruding from the machine, to the interior of the eye. This light, as powerful as sunlight, is absorbed by the pigment of the eye and a coagulation is created which can serve to seal off retinal tears; destroy certain tumors; and coagulate vessels in certain conditions which cause hemorrhage in the eye.

Installed in Presbyterian-St. Luke's Eye Clinic earlier this year, the Photocoagulator was thoroughly tested on rabbits prior to its use on human beings, and since that time has been used successfully on private and clinic patients as a substitute for certain treatments which formerly would have required surgery.

During the month of March, *Dr. Oglesby Paul* made a two week trip to England, Scotland and Wales under the auspices of the United States Public Health Service, as a member of the United States-United Kingdom Committee on Coronary Disease and Chronic Pulmonary Disease.

In May, Dr. Paul spoke on "Employment of Individuals with Cardiovascular Disease" before the New York State Medical Society. And Drs. Paul and *John T. Reynolds* participated in the recent Illinois State Medical Society meeting. Dr. Paul lectured on "Management of Arrhythmias"; Dr. Reynolds moderated a panel on "Diaphragmatic Hernia" and participated in a panel discussion, "Infections of the Skin."

In early March, Dr. Reynolds spoke before the Kenosha County Medical Society. His subject: "Biliary Tract Surgery."

Drs. Reynolds, *R. K. Gilchrist*, and *Edward J. Beattie, Jr.* were in White Sulphur Springs in April for the annual meeting of the American Surgical Association. At this same time, Dr. Gilchrist attended the annual meeting of the American Board of Surgery.

In mid-March, Dr. Gilchrist attended the Sectional Meeting, American College of Surgeons in Colorado Springs where he spoke on "Inflammatory Lesions of the Colon." And later in March, he went to Indianapolis to participate in a Cancer Symposium co-sponsored by Indiana University School of Medicine and Indiana Division, American Cancer Society. He presented two talks entitled: "The Lymphatic Spread of Carcinoma of the Colon and Rectum" and "The Technique, Indications and Results of Abdominal-Perineal Resection."

Late in April, Dr. Beattie was in Memphis for the meeting of the Society of Clinical Surgery and in mid-May Drs. Beattie and *Hiram T. Langston* attended the American Association for Thoracic Surgery meeting in Miami Beach. Dr. Langston is Secretary of this Association.

Dr. Langston went to New York in March to attend the meeting of the Medical Education Committee of the American Trudeau Society. Also in March, Drs. Langston and *Steven G. Economou* participated in the First Illinois Cancer Congress held in Springfield. Dr. Langston was a panel member discussing "Cancer of the Lung"; Dr. Economou participated in a panel on "Early Diagnosis and Treatment of Oral Cancer."

Again in March, Dr. Economou went to Pontiac, Michigan, where he spoke before the Livingston County Branch, American Cancer Society on "Current Trends in Cancer Research." In April, he was a panel participant at the North Suburban Branch, Chicago Medical Society. The subject: "Current Adjuncts in Cancer Therapy."

ELECTIONS AND APPOINTMENTS

Dr. Noel G. Shaw, Chairman-Elect, Illinois Congress of National and Infant Welfare.

Dr. Donovan G. Wright, Member, Professional Advisory Council to DuPage Mental Health Society.

Dr. Benjamin Gasul, Chairman, Advisory Committee of the Congenital Heart Disease Research and Training Program, and Member, Committee on Education, Council on Rheumatic Fever and Congenital Heart Disease, both of the American Heart Association.

Dr. George M. Hass, Member, Committee on Division of General Medical Sciences, U.S. Public Health Service; Member, Council of American Association for Advancement of Science.

Dr. Steven G. Economou, Member, Central Surgical Association.

Dr. Kenneth C. Johnston, Fellow, American Laryngological Association.

Dr. Paul H. Holinger, North American Chairman, Section of Otolaryngology, Pan American Medical Congress.

Dr. Ladislas J. Meduna, Editor-in-Chief, Journal of Neuro-psychiatry.

Dr. Harry F. Dowling, re-elected Member, Committee on Revision, U.S. Pharmacopoeia.

Dr. James H. McDonald, Secretary, Chicago Urological Society.

Dr. Lowell F. Peterson, National Chairman, Audio Vision Education, American College of Obstetrics and Gynecology.

Drs. John R. Wolff and James E. Fitzgerald, Co-Chairmen, Illinois Academy of General Practice Post-Graduate Instructional Course in Obstetrics.

Dr. Noel G. Shaw was in Atlantic City in April to attend the Spring Session of the American Academy of Pediatrics and also the Certified Milk Producers Association meeting. He attended the latter as a member of the Milk Commission of the Chicago Medical Society. In early March, as a member of the Executive Committee of the Chicago Medical Society's Clinical Conference, Dr. Shaw arranged the Pediatric lecture-course and served as moderator for the panel discussion on "Feeding Problems in Children."

"Operability in the Young and Aged" was the paper presented by *Dr. Warren H. Cole* before the Section on Geriatrics and Gerontology of the Pan American Medical Association meeting held in Mexico City early in May. In April, Dr. Cole was in Minneapolis to attend the Sectional Meeting of the American College of Surgeons. At this meeting he presented a paper on "Prophylactic and Adjuvant Treatment for Cancer of the Breast" and moderated a panel on "Gastrointestinal Bleeding."

In Atlantic City in early May, *Drs. Donovan G. Wright, Francis J. Gerty, Alfred P. Solomon, and Ladislas J. Meduna* attended the American Psychiatric Association meeting. Dr. Gerty, immediate Past-President of the Association, is Chairman of the Section devoted to "Papers on Education"; Dr. Wright is a member of the Association's Committee on Rehabilitation, which presented a Round Table discussion on "The Impact of the 'Open Door' on Activity Programs in Psychiatric Services."

While in Atlantic City, Dr. Meduna attended the annual meeting of the American Society of Medical Psychiatry.

MEDICAL STAFF ACTIVITIES

In March, Dr. Gerty presented a paper before the Rock Island County Mental Health Society. His subject: "Local Community Responsibility in Mental Health." In April, he went to New York to attend a meeting of the Long-Term Policies Commission of the American Psychiatric Association.

Dr. Solomon spoke before the recent Tri-State Hospital Assembly's Conference of Hospital Volunteers on "The Role of the Volunteer in Psychiatric Services." In mid-April, he attended the meeting of the Liaison Committee of the American Hospital Association and the American Psychiatric Association held in Chicago.

In March, Dr. Benjamin M. Gasul presented a paper, "Congenital Heart Disease," at the University of Miami Medical School Post-Graduate Course. Also in March, Dr. Gasul was in San Antonio, Texas, to speak before the San Antonio Heart Association and San Antonio Pediatrics Society. His subject: "The Indications and Contraindications for Angiocardiography." Late in May, he attended the American College of Cardiology's meeting in Indianapolis where he presented a paper entitled "The Diagnosis of Acyanotic Congenital Heart Disease."

At the First Annual Cancer Symposium, sponsored by the American Cancer Society, held at Wayne State University in April, Dr. Harry W. Southwick presented a paper entitled "Surgery for the Treatment of Oral Cancer." Also in April, Dr. Southwick went to Philadelphia for the annual meeting of the Society of Head and Neck Surgeons, of which he is Secretary-Treasurer, and from there to New York for the James Ewing Society's annual meeting.

Drs. Thomas J. Coogan, J. L. Koppel and John H. Olwin attended the recent Conference on Thrombolytic Agents, sponsored by the Hematology Study Section of the National Institutes of Health, held at the Pick-Congress Hotel.

In mid-March Drs. Olwin and Koppel attended the International Symposium on "Blood Platelets" at Detroit's Henry Ford Hospital, where Dr. Koppel gave a paper entitled "Effects of Sulphydryl Inhibitors on Structural Stability of Platelets." From Detroit Dr. Koppel went on to New York to attend a Symposium on "Fibrinolysis," sponsored by The Sloan-Kettering Institute for Cancer Research.

Drs. Olwin and James H. McDonald participated in the American Urological Association's meeting held in Chicago in May. Dr. Olwin served on a panel discussing "Blood Coagulation Problems in Urologic Patients"; Dr. McDonald presented a paper on "Cancer Cells in the Circulating Blood During Surgery of Genito-Urinary Tumors."

Also in May, Dr. McDonald spoke on "Ureteral Regeneration Following Intubated Ureterotomy of Ureteral Strictures Produced by Rapid Freezing" (co-author, Dr. J. A. Calams) before the Wisconsin State Medical Society.

Dr. Henry W. Apfelbach went to Mexico City in April to give a paper before the Sixth National Orthopaedic and

Traumatology Congress. His subject: "Congenital Dysplasia of the Patella."

At the meeting of the American Society for Experimental Pathology held in Chicago in mid-April, Dr. Robert W. Carton presented a paper on "Physical Properties of Single Elastic Fibers" (with John Dainauskas); and Dr. Richard H. Andresen gave a paper on "Absence of Classical Homologous Tissue Reactions Following Transfusion of Blood from Multiple Donors other than Donors of Grafts" (with Drs. C. W. Monroe, G. M. Hass, D. A. Madden and S. Papadopoulos).

In May, Dr. Carton was in Los Angeles where he attended the meeting of the American Trudeau Society.

In March, Dr. James W. Merricks spoke on "Differential Diagnosis of Retro-peritoneal Tumors" at the Ravenswood Hospital Clinical Congress; and in April, at the Highland Park Hospital Clinical Congress, he spoke on "Nuclear Sex Studies" and showed a color movie entitled "Hypospadias Repair."

At the American Association for Cancer Research's annual meeting in Chicago in April, Dr. Frederic A. dePeyster presented a paper on "Laboratory and Clinical Evaluation of 1-(4-Dimethylamino Styryl) Isoquinoline (1M210) as an Antitumor Agent" (with Dr. L. J. Humphrey and E. T. Hoppe). Also in April, Dr. dePeyster spoke before the Illinois Academy of General Practitioners in Springfield. His subject: "Safeguards in the Care of Postoperative Patient"; and in May, he went to Toledo to present a paper, "Treatment of Complex Fistulai-in-Ano," before the Northern Tri-State Medical Association.

Drs. Paul H. Holinger and Kenneth C. Johnston were in Miami Beach in mid-March to attend meetings of the American Bronchoesophagological Association, the American Laryngological Association and the American Laryngological, Rhinological and Otological Society. Dr. Johnston presented a paper before the latter Society entitled "The Procurement and Processing of Endoscopic Biopsies" (with Dr. Holinger).

While in Miami, Dr. Holinger attended the VII Pan American Congress of Otolaryngology and Bronchoesophagology, of which he is President.

Later in March, Dr. Johnston was in New Orleans for the annual meeting of the American Gastroscopic Society; and in mid-May, he went to Aberdeen, South Dakota, to deliver a paper before the South Dakota State Medical Society. His subject: "Respiratory Emergencies in the Newborn and Early Childhood."

In Atlantic City in May, Dr. Theodore B. Schwartz attended the meeting of the American Society for Clinical Investigation. In March, Dr. Schwartz participated in a group discussion of "Thyroid Acropachy" on the Chicago Medical Society Television Series, originating from Cook County Hospital and viewed at the Palmer House.

Dr. Clark W. Finnerud prepared a pamphlet for the American Medical Association on "The Acne Problem" which appeared in TODAY'S HEALTH in March.

Drs. Donald D. Layton and George P. Guibor attended the April meeting of the American Academy of Neurology held in Miami. Also in April, Dr. Layton presented a paper before the Chicago Neurological Society entitled "Jakob-Creutzfeldt Disease. Report of a Case with Necropsy Findings."

Dr. Guibor's textbook, "Squint and Allied Conditions," released last June, has had a number of favorable reviews.

Late in May, *Dr. Robert D. Ray* was in Washington, D.C. to attend the National Academy of Sciences Seminar on "Formation of Organic Skeletal Matrix." The first part of May, *Dr. Claude N. Lambert* attended the National Academy of Sciences, National Research Council Program on "Adult Amputees."

At the recent Post-Graduate Course in Ophthalmology at the University of Michigan, *Dr. William F. Hughes* presented three talks: "Diagnosis of Corneal Dystrophy and Treatment by Corneal Transplantation"; "Management of Keratitis"; and "Management of Uveitis."

In March, *Dr. Danely P. Slaughter* was in Boston where he presented a paper, "Techniques of Neck Dissections," and participated in the Cancer Clinic Workshop at the American College of Surgeons' Sectional Meeting. In May, Dr. Slaughter went to Cleveland to speak on "Pre-cancerous Lesions of the G.I. Tract" before the Ohio State Medical Society.

In April, in Chicago, Drs. Slaughter, *Frank R. Hendrickson* and *Samuel G. Taylor III* participated in a panel discussion on "What's New in Cancer" at the American Society for Railroad Surgeons' meeting.

Also in April, Dr. Taylor gave a paper on "Chemotherapy in Disseminated Anaplasia" before the North Shore Branch of the Chicago Medical Society.

Drs. Taylor, *Donald W. Tarun*, *Lester A. Nalefski* and *Howard Wakefield* attended the recent annual session of the American College of Physicians held in San Francisco. Dr. Wakefield is a member of the College's Board of Regents, and Dr. Taylor was a participant in a panel on "Newer Aspects of Cancer Chemotherapy."

Drs. William F. Mengert, Lowell F. Peterson, John R. Wolff, James E. Fitzgerald, and William F. Geittmann attended the 8th Annual Clinical Meeting of the American College of Obstetricians and Gynecologists in Cincinnati in April.

Also in April, Dr. Peterson attended the LaPorte County Medical Society's Cancer Symposium.

Late in May, Dr. Mengert was in Williamsburg, Virginia, to attend the meeting of the American Gynecological Society.

Dr. F. J. Szymanski attended the meeting of the American

Dermatological Association in Boca Raton, Florida, in April where he presented a paper entitled "Nodular Fat Necrosis of the Skin Associated with Diseases of the Pancreas."

Dr. Paul W. Greeley was in Ojai, California, recently as a guest at the annual meeting of the California Society of Plastic Surgeons.

In mid-April, *Dr. A. Beaumont Johnson* attended the Harvey Cushing Society meeting held in San Francisco.

In April and May, *Dr. Louis W. Schultz* travelled to France, England, Italy and Germany where he presented papers on "Cleft Lips and Palates" and on "Temporamandibular Joints."

Dr. Gerald E. Guemmer went to Tampa in March to attend a seminar-workshop, led by Dr. J. Brown Farrior, on "Stapes Mobilization and Tympanoplasties."

In March, *Dr. Harry F. Dowling* attended the following meetings: National Advisory Allergy and Infectious Diseases Council of the National Institutes of Health in Bethesda; Council on Drugs, American Medical Association, in Chicago; and the U.S. Pharmacopeal Convention in Washington, to which he was a delegate.

"Diagnosis and Treatment of Intermittent Claudication" and "Recent Advances in Vascular Surgery" were subjects of *Dr. Geza de Takats'* papers presented before the meeting of the Illinois Heart Association in early May in Peoria. Also in May, Dr. de Takats participated in a panel discussion at the Clinico-Pathologic Conference held at Cook County Hospital, and at the meeting of the Western Society of Engineers he spoke on Heart-Lung Machines.

Dr. James A. Campbell delivered the Annual Alpha Omega Alpha Lecture at the University of Colorado Medical Center commencement exercises on March 26. His subject: Medical Education. In April, Dr. Campbell attended the meeting of the Association of American Medical Colleges in New York; the Executive Meeting of the National Internship Matching Plan, American Hospital Association; and the Part III Committee of the National Board of Medical Examiners in Philadelphia.

The Chicago Surgical Society held its Clinical and Scientific Program at Presbyterian-St. Luke's on April 1. Under the Chairmanship of Dr. Edward J. Beattie, Jr., Operative Clinics were held at 8:00 a.m. and at 10:30 a.m. members and guests attended the Scientific Program in the A. B. Dick Lecture Room. Participants on the program, moderated by Dr. Beattie, included the following members of the Medical Staff: Drs. Steven G. Economou, John H. Schneewind, John W. Curtin, Paul W. Greeley, E. Lee Strohl, Willis G. Diffenbaugh, Steven H. Nyi, R. Kennedy Gilchrist, Robert W. Jamieson, Foster L. McMillan, Ormand C. Julian, William S. Dye, Jr., Hushang Javid.

SCHOOL FACULTY CONDUCTS CONFERENCE

In response to many inquiries about the new curriculum and Nurse-Internship program of the Presbyterian-St. Luke's Hospital School of Nursing, the Faculty conducted an Education Conference at the School on April 8 and April 9. A total of 100 registrants from 48 schools and eight organizations and 30 faculty and staff members participated in the Conference.

The session opened with a panel presentation of the development of the curriculum and the contribution of the departments of Natural Science, Social Science, Professional Orientation, Communication, and Nursing in the curriculum pattern for the two years of Basic Education and Clinical experience.

Participants then attended the first of four group conferences structured to project specific areas within each department. These areas included general nursing, medical-surgical nursing, psychiatric nursing, maternal and child care, psychology, human development, communication skills, American culture. The Nurse-Internship year was presented to the entire group in an afternoon session and again for subsequent group discussion.

Miss Edith D. Payne, Director of the Nursing Department, presided at the opening panel presentation and the final summarization. The Woman's Board and Nursing Council were represented by Mrs. Fentress Ott, Mrs. George S. Chappell, Jr., Mrs. John V. Farwell, Mrs. Frank P. Hixon, and Mrs. Charles Balfanz. The Presbyterian and the St. Luke's Alumnae Associations were represented by their presidents, Miss Anne Kimmel and Mrs. Louis Gdalman. Miss Freda Treptow represented the Illinois Department of Registration and Education.

Among the 48 schools represented, 19 are located in the Chicago area.

Edith D. Payne, Director of Nursing, addresses guests at Educational Conference in A. B. Dick Lecture Room. Panel participants, left to right: Florence Lockerby, Chairman, Department of Communication; Hans Mauksch, Chairman, Department of Sociology; Virginia Lapie, Chairman, Department of Nursing; Ruth Ferguson, Chairman, Department of Professional Orientation; Magdalene Steward, Chairman, Department of Natural Science; and Blanche Urey, Associate Director, School of Nursing.

Patient Library Reading Room recently redecorated by the Woman's Board.

35 INTERNSHIPS FILLED

Through the National Matching Plan for Internship, Presbyterian-St. Luke's was notified that 35 medical school seniors have chosen the hospital for their internships. This number is only four short of the hospital's established quota, and, considering the shortage of medical school graduates today, the Intern Committee of the Medical Staff is very pleased with these results.

The 35 young doctors, who will begin their internships on July 1, come to the hospital from the following medical schools: University of Illinois—12; Marquette University—5; Stritch School of Medicine—4; two each from the University of Chicago, Creighton University, St. Louis University, and Washington University; and one each from the University of Vermont, University of Maryland, Northwestern University, Baylor University, George Washington University, and University of Rochester.

ANNUAL HOSPITAL DAY

In observance of National Hospital Week and to honor members of the "hospital family" for their years of service, Presbyterian-St. Luke's Annual Hospital Day Reception was held on the afternoon of May 12 in the School of Nursing.

John P. Bent, President of the Board of Trustees, presented U.S. Savings Bonds to hospital employees with 10, 15, 20, 25, 30, 35, 40 and 45 years of service. Three employees observed their 40th Anniversary: Katie Griffin, Hematology Department; David Griffin, Housekeeping; and Dan Pankoff, Maintenance Department; and two employees received special tribute for over 45 years of service: Nona Call Alberti, Purchasing Department; and Hazel Loughrin, Accounting.

In addition, Mr. Bent presented Quarter-Century Certificates to members of the Board of Trustees, Medical Staff, Woman's Board and Medical Staff Auxiliary for 25 or more years of

DR. HERBERT N. BROCKWAY

CLARENCE C. TRAUM

GLENNETTE WOODARD

association with the hospital. These were awarded to: 9 Trustees; 43 doctors; 8 members of the Woman's Board; and 6 members of the Medical Staff Auxiliary.

The Awards Program concluded with a special presentation of Half-Century Certificates to: John B. Drake, who has served on the Board of Trustees since 1907; Dr. Wilber E. Post, a member of the Medical Staff since 1906; and Dr. Clifford G. Grulée, a member of the Staff since 1909.

NEW CHAPLAIN

Dr. Herbert N. Brockway has been appointed the Presbyterian Chaplain of the hospital working in association with Rev. William Wagner, the Episcopal Chaplain.

Dr. Brockway, a member of the hospital's Clerical Board from 1954 to 1959, succeeds Dr. Louis W. Sherwin, who has retired after serving as Hospital Chaplain for over ten years.

A former pastor of the Fair Oaks Presbyterian Church in Oak Park, Dr. Brockway served the

Presbytery of Chicago as general presbyter from 1956 until he resigned to become Hospital Chaplain.

ADMINISTRATIVE APPOINTMENT

Norman A. Brady, Director, has announced the appointment of Clarence C. Traum as an Administrative Assistant.

Mr. Traum received his Masters in Business Administration with a Major in Hospital Administration from the University of Chicago and recently completed serving his Administrative Residency at Presbyterian-St. Luke's.

VOLUNTEER DIRECTOR APPOINTED

Effective April 18, Miss Glennette Woodard assumed the duties of full-time Director of Presbyterian-St. Luke's Volunteers.

Miss Woodard has been in charge of Saturday Volunteers since October and in her new position will be assisted by the Volunteer Committee of the Woman's Board, under the Chairmanship of Mrs. William F. Drews and Vice-Chairmanship

of Mrs. Paul E. Davies.

Prior to joining the Presbyterian-St. Luke's family, Miss Woodard served as a Volunteer at Elmhurst's Memorial Hospital and, in the business world, had experience in Personnel work.

GRANT FOR RESEARCH

Through its interest in the "many facets by which Brewer's Yeast is able to improve human and animal nutrition," The Brewers Yeast Council, a non-profit organization, has presented a \$5,000 Grant to the Renal and Nutritional Unit of the hospital. Under the direction of Dr. Robert M. Kark, attending physician, this grant will be used for the study of the effects of Brewers Yeast in the treatment of renal disease.

Freshman student nurses "thank heaven" for their fathers at recent "Dad's Day" held in the School of Nursing. The theme for the day was "Thank Heaven for Little Girls," a tune from "Gigi," and the ninety fathers attending wore name badges resembling little straw hats with ribbons.

THE NURSE INTERN

—a new nomenclature

in the nursing profession

THIS IS NELLA TER HAAR, Nurse Intern, a member of the Class of 1960, Presbyterian-St. Luke's Hospital School of Nursing.

On September 8 of this year, this Class of 1960 will become the first graduates of the new Presbyterian-St. Luke's School, established in 1957 as a result of the consolidation of the Presbyterian and the St. Luke's Schools. They will have completed a new diploma program, developed by the School Faculty, of two years of basic nursing education plus one year of salaried Nurse Internship.

As Nurse Interns, Miss Ter Haar and her classmates have practiced their profession under the supervision of the Head Nurses and Supervisors and have proven capable of performing the duties of the beginning practitioners of nursing while learning new responsibilities along the way.

Here is Miss Ter Haar's story of her experience as NURSE INTERN.....

P R E S B Y T E R I A N - S T . L U K E ' S H O S P I T A L

**D E D I C A T E D T O T H E G L O R Y O F G O D
A N D T H E S E R V I C E O F M A N**

Last September 27 we became Nurse Interns at a special promotion service held in the Church of the Epiphany, located near the Medical Center District.

This change from "student grays" to "intern whites" was a most dramatic feeling for all of us, particularly when we returned to the patient units. We noticed that our relationship with the patients had changed—we were no longer students in their eyes. We had their complete confidence, an inspiration to us all to carry through.

As the first Nurse Interns to serve on the patient units, we anticipated that there would be doubts—we were something new. Very soon, however, doctors

and nurses developed confidence in us and we were taken in as an integral part of the health team. As students, our discussions with doctors always included our clinical instructor; as Nurse Interns, oftentimes doctors approached us directly about patient care.

In our first two years as student nurses we learned the basic principles of nursing care; we learned how to care for the patient as a person. We studied chemistry, physics, mathematics, sociology, psychology, communication, and nutrition. We had wonderful opportunities in the patient areas to gain experience in giving nursing care. The instructor worked closely with us to tie together the classroom learning and actual experience.

As Nurse Interns we spent a minimum of twelve weeks in both the medical and the surgical areas.

- 2) We performed certain procedures, such as the taping of a foot cast, which I am discussing with Mrs. Inge Mauksch, Assistant Director of the School in charge of the Nurse Internship Program.
- 3) Problems of management of the patient unit were discussed with the Head Nurse or Supervisor, in this case Miss Patricia Brown, Supervisor.
- 4) Serving as "team leaders" we worked closely with Licensed Practical Nurses and Nurse Aides in planning patient care and making assignments.
- 5) There were the little things that mean so much such as looking over a patient's get-well cards with him, or
- 6) accompanying an ambulatory patient to the Chapel for a brief moment of meditation.
- 7) Of course, there was always time out for lunch in the hospital's air-conditioned cafeteria.
- 8) On the evening "tour of duty" one of our responsibilities was making rounds to see all of our patients and to give medications to those who needed them.

9

10

All of us spent four weeks in Psychiatry giving patient care,
9) joining in the patients' activities and
10) learning the use of certain crafts, such as the
potter's wheel, in order to help the patients in their
creative work.

We also were assigned four weeks in Obstetrics, where we
cared for mothers and babies.
11) Showing new babies to their fathers was a
particular thrill.

A four week assignment took us to the Pediatrics Department where, in addition to giving nursing care, we learned to meet other needs for love and security by encouraging happy times in the playroom—

- 12) playing with a balloon,
- 13) helping a "little mother" in her "house," or
- 14) giving comfort to a child not yet accustomed to his new surroundings.

11

12

7

8

13

14

15

16

All of us had an opportunity to choose one twelve week assignment in a clinical area in addition to the required assignments. I selected the Operating Room because of my interest in surgery.

15) "Scrubbing" in preparation for an operation gave us an opportunity to learn about the case in advance, and

16) assisting in the operating room was a wonderful way to help patients.

Throughout our Nurse Internship we attended weekly seminars in all areas of our clinical assignment.
17) Physicians play an important part in these seminars, which are centered around the patient and his needs.

18) The desire for further knowledge often led us to the Library in the School.

19) After our "tour of duty" the School lounges offered a comfortable place in which to relax for a few moments with friends.

18

Many recreational and social activities were available to us in the School Residence—music appreciation, art classes, a chance to participate in the student "Variety Show," volley ball, School dances, and
20) for those who wanted to stay trim, physical fitness classes.

Some of us served on the Student Council and worked with the Student Nurses Association of Illinois, 1st District. I was fortunate in being a delegate to the National Student Nurses Association Convention held in Miami. My classmates held a spaghetti dinner in the School to raise funds to send me to Miami.

21) Those interested were given the opportunity to work on the School Yearbook. Here I'm discussing plans for our book with Miss Blanche Urey, Associate Director of the School.

22) And, there's always the usual free time.

23) As my year of Nurse Internship draws to a close, I had a conference with Miss Edith D. Payne, Director of Nursing, about my future plans. A large number of us will take our place on the Presbyterian-St. Luke's Staff after graduation.

20

21

22

I know I speak for the entire Class of 1960 when I say that we have been fortunate to have been the pioneers in this new program. It has been a tremendous experience and we are grateful to the many people at Presbyterian-St. Luke's who were so generous with their time and talents for us. All 160 of us, wherever we may practice our profession in the years to come, will be proud to say that we were the first graduates of the new program of the Presbyterian-St. Luke's School of Nursing—that we paved the way for the classes of the future—that we proved the Nurse Intern is here to stay!

Indeed, Miss Ter Haar, you do speak for the Class of 1960 for, as its President, you are in a position to express the feelings of your classmates.

Her three years nearing completion, Nella Ter Haar, student nurse for two years, Nurse Intern for one year, will soon become Nella Ter Haar, Graduate Nurse, as she and her classmates receive their diplomas on September 8 in Chicago's Orchestra Hall and become the first nurses to wear The Pin of the Presbyterian-St. Luke's Hospital School of Nursing.

THE SCHOOL OF NURSING

certifies that *Nella Arlene Ter Haar* has completed satisfactorily the basic nursing program of this school. IN TESTIMONY WHEREOF the undersigned have affixed their signatures and seal of the School of Nursing on this 8th day of September, 1960.

Edith A. Payne *John P. Best*
DIRECTOR, SCHOOL OF NURSING PRESIDENT
E. A. Brady
SECRETARY, HOSPITAL

The shape of the pin is the quatrefoil, which is floral in origin, used largely in architecture for stained glass windows and wood carvings. The four petals denote the four cardinal virtues, namely justice, prudence, temperance and fortitude.

The contour of the quatrefoil frames the outline of the Latin Cross, seen publicly in the reign of Constantine the Great, the first Christian Roman Emperor, crowned in 306 A. D. The arms of the cross are in the trefoil design, suggesting the Holy Trinity. This form is known as the "budded cross."

The Latin Cross with twelve or more rays of light issuing from the center is called the rayed or Easter Cross. The color blue connotes truth and loyalty.

The effect of the overall design is that of a window through which one glimpses the rayed cross, signifying life, sacrifice and service.

AWARDS FOR MERITORIOUS WORK

—presented annually to members of

Presbyterian-St. Luke's resident and intern staff.

Dr. Edward J. Beattie, Jr., right, Chairman, Division of Surgery, presents "Rush Medical College Award to a Resident in Surgery" to Dr. Richard A. Tarizzo.

Five residents and one intern, members of the 1959-60 House Staff, recently were honored for their outstanding work during the past year. The six awards, presented annually, and this year's winners are as follows:

Dr. John D. Best received the DR. WILL F. LYON AWARD presented to the Intern who "in the performance of his duties best exemplifies the high devotion and dedicated service which have characterized Dr. Lyon's professional career." This award of \$300 was established by International Harvester Company to honor Dr. Lyon, who headed the Company's Medical Department for many years and is on the hospital's Emeritus Staff.

Dr. Best, formerly of Peoria, Illinois, graduated from the University of Illinois College of Medicine and will serve his Residency in Medicine at Presbyterian-St. Luke's.

The RUSH MEDICAL COLLEGE AWARD to a Resident in Surgery was presented to Dr. Richard A. Tarizzo. This award, in the amount of \$100, was established by the Rush Trustees.

Dr. Edward A. Downs, left, receives "Rush Medical College Award to a Resident in Medicine" from Dr. James A. Campbell, Chairman, Division of Medicine.

Dr. Tarizzo, formerly of Joliet, Illinois, is a graduate of the University of Illinois College of Medicine. He served his internship at Presbyterian-St. Luke's and will continue his Residency in Surgery at the hospital.

The RUSH MEDICAL COLLEGE AWARD to a Resident in Medicine was presented to Dr. Edward A. Downs. This is another award in the amount of \$100 which was established by the Rush Trustees.

Dr. Downs, formerly of Ridgewood, New Jersey, received his M.D. degree from George Washington University and served his internship at Presbyterian-St. Luke's. He will go into private practice in Lubbock, Texas.

The SURGICAL TRAVELLING FELLOWSHIP to the London Hospital, London, England, for one year was awarded to Dr. E. Wilson Staub, Resident in Surgery. This award is supported through the generosity of an anonymous benefactor of the hospital.

Dr. Staub, formerly of Glencoe, Illinois, graduated from Northwestern University's Medical School and interned at Evanston Hospital. After his year in England, he will return to Presbyterian-St. Luke's to continue his Residency in Surgery.

The DR. FREMONT A. CHANDLER MEMORIAL RESEARCH AWARD, established by an anonymous donor in memory of the late Dr. Chandler, attending orthopedic surgeon, was presented to Dr. Andres Gabel, Resident in Surgery. This award, \$100 and a scroll, is presented to a Resident and its purpose is "to encourage original research in either the basic sciences or in clinical problems."

Dr. Gabel, formerly of Bogota, Colombia, received his M.D. degree from Universidad Catolica Javeriana. He interned at the Hospital de la Samaritana (Bogota) and at Ravenswood Hospital in Chicago. He will continue his Residency in Surgery at Presbyterian-St. Luke's.

The MCNEIL MEMORIAL RESEARCH AWARD, established by Mrs. Allan McNeil in memory of her husband, was received by Dr. Will D. Ryan, Resident in Medicine. This award, in the amount of \$100, is presented to an Intern or Resident for an outstanding research project.

Dr. Ryan, formerly of Houston, Texas, graduated from Baylor University College of Medicine and interned at Presbyterian-St. Luke's. He will be stationed with the Air Force in Turkey.

Dr. Joseph A. Davis, right, Attending Physician, presents "Dr. Will F. Lyon Award" to Dr. John D. Best.

Dr. Beattie congratulates Dr. E. Wilson Staub, recipient of "Surgical Travelling Fellowship Award."

Doctors demonstrate a needle biopsy of the liver using the new Menghini liver biopsy needle and "two-operator" technique developed in Italy in 1958 and only recently put into use clinically in this country.

This is only one example of the many new devices and techniques being used by Presbyterian-St. Luke's doctors in the interest of safety and comfort for the patient.

Needle biopsy of the liver, a valuable diagnostic procedure, has been done for some time by other instruments. The Menghini needle, considerably smaller both in length and diameter than other needles, and "two-operator" technique provide a simplified, speedier and safer method of liver biopsy. While the patient is under local anesthetic, a small stylet makes a preliminary perforation into the skin. The hollow needle is then inserted and easily passes through the skin. The doctor manipulating the needle directs his assistant in operation of the syringe, which provides the suction necessary to draw tissue into the Menghini needle.

The actual maneuvering of the needle into and out of the liver to remove a piece of tissue for diagnostic purposes takes but one to two seconds. Any discomfort to the patient is negligible.

MEDICAL

STAFF ACTIVITIES

Many members of the Medical Staff attended the Annual Meeting of the American Medical Association held in Miami Beach in June. Those participating on the program included: Dr. Robert J. Jensik, who was on a panel discussing "Treatment of Tumors of Trachea and Bronchi"; Dr. Paul H. Holinger, Chairman of the Association's Section on Laryngology, Otology and Rhinology, who conducted a panel on "Tumors of the Lower Respiratory Tract"; and Dr. Harry F. Dowling, who attended the meeting as a member of the House of Delegates.

An exhibit, "The Lost Art of Urinalysis," by Drs. Victor E. Pollak, Robert M. Kark, Robert C. Muehrcke, and C. L. Pirani, received a Certificate of Honorable Mention at this Annual Meeting. This exhibit was made by the Department of Medical Illustration, University of Illinois, and the Department of Medical Photography, Presbyterian-St. Luke's.

In June, Dr. Harry F. Dowling spoke on "Newer Antibiotics" at a Staff Meeting of McKinley Hospital, University of Illinois in Urbana. Late in June, he was in Bethesda, Maryland to attend a meeting of the Advisory Allergy and Infectious Diseases Council, National Institutes of Health.

Drs. Gerald O. McDonald, Warren H. Cole, and Frederic A. dePeyster attended the meeting of the newly formed Association for Colon Surgery held in Miami in June. Dr. McDonald presented a paper, "Growth of Cells from Cancer of the Colon and Rectum in Tissue Culture," and, with Dr. Cole, had an exhibit, "Stress and Decreased Resistance to Cancer," which was awarded a Certificate of Merit.

While in Miami, Dr. Cole presented a paper on "Nutritional Problems and Operability in the Aged" before the meeting of the American Geriatrics Society, and in July in Denver, he spoke on "Recent Advances in the Treatment of Cancer" at the Rocky Mountain Cancer Conference. In August, Dr. Cole was in New Hampshire to present a paper before the Gordon Research Cancer Conference. His subject: "Clinical Problems in Metastases."

Late in June, Dr. McDonald went to San Diego to give a paper on "Chemotherapy of Cancer as an Adjunct to Surgery" at the Symposium on Clinical Medicine and Surgery.

In mid-June, Drs. Roland P. Mackay and Eric Oldberg attended the American Neurological Association meeting held in Boston. Dr. Oldberg, while in Boston, and Dr. Raymond A.

Clasen attended the American Association of Neuropathologists meeting, where Dr. Clasen presented a paper on "The Relationship of Cerebral Edema to the Fiber Pattern of White Matter."

Earlier in June, Dr. Mackay attended meetings of the Society of Biological Psychiatry in Miami.

Dr. Evan M. Barton recently returned from Great Britain where he attended the Heberden Society meeting in Manchester, England, and also the Fourth International Goiter Conference in London.

Dr. Francis J. Gerty served as Seminar Leader at the Pastoral Psychology Workshop held early in July at St. John's University, Collegeville, Minnesota.

ELECTIONS AND APPOINTMENTS

Dr. Frank E. Trobaugh, Jr., Vice President, Illinois Association of Blood Banks.

Dr. Raymond A. Clasen, Member, American Association of Pathologists and Bacteriologists.

Dr. Paul W. Greeley, Vice President, Chicago Surgical Society (1961)

Dr. James W. Merricks, Re-elected Secretary-Treasurer, Alumni Association of Rush Medical College.

Dr. Edwin F. Hirsch, Trustee, Chicago Medical Society, for 5 year term.

Dr. Eric Oldberg, Member, Council of the Society of Neurological Surgeons; Member, Sub-Committee on Evaluation of Permanent Impairment of Peripheral Nerves, American Medical Association.

Dr. Howard Wakefield, Member, Executive Committee, Chicago Society of Internal Medicine.

Dr. Donald D. Layton, Associate Member, American Association of Neuropathologists.

Dr. Edwin C. Graf, President-Elect, Northcentral American Urology Society.

Dr. Robert J. Jensik, President, North Shore Branch, Chicago Medical Society; renominated Member, Board of Directors, Tuberculosis Institute of Chicago and Cook County.

Dr. Warren H. Cole, President, Association for Colon Surgery, a newly formed organization.

Dr. Edward J. Beattie, Jr., Member, American Board of Thoracic Surgery (1960-65).

Dr. Hushang Javid, Member, Society for Vascular Surgery.

Dr. Samuel G. Taylor III was in Los Angeles in June to attend a meeting of The Joint Committee on Cancer Staging and End Result Reporting. Later in the month he made a sight inspection visit to the University of Minnesota for the U.S. Public Health Service as Consultant for the Cancer Control Program.

Dr. Danely P. Slaughter attended the mid-year meeting of the Professional Education Committee of the American Cancer

Society held in Los Angeles in June. While in the west, he also attended the Executive Committee meeting of the Committee on Cancer, American College of Surgeons, and late in June went to Rockland, Maine to present a paper entitled "Changing Concepts in Management of Cancer" before the Maine Medical Association.

Dr. Slaughter is in the process of completing a monograph on "Oral Cancer" for the American Cancer Society to be distributed to every doctor and dentist in the United States.

Early in June, *Dr. Charles B. Puestow* lectured before the County Medical Society in Oshkosh, Wisconsin, on "Surgery of the Pancreas."

"Recent Trends in Cancer Therapy" was *Dr. Harry W. Southwick's* address before the Annual Meeting of the Northern Kane County Chapter of the American Cancer Society held in June in St. Charles, Illinois.

Dr. Theodore B. Schwartz was in Europe during July and visited Professor Charles E. Dent, Head of the Metabolic Unit of the University College Hospital Medical School in London. Also he attended the First International Conference of Endocrinology held in Copenhagen, where he presented a paper entitled "Hormonal Influences on Intracellular Peptidase Activity."

"Surgical Treatment of Diverticulitis of Sigmoid Colon" was the title of *Dr. R. K. Gilchrist's* paper presented before the Coles County Medical Society in Mattoon, Illinois in June.

Dr. Paul W. Greeley was in Milwaukee recently to attend the meeting of the American Association of Plastic Surgeons.

Dr. Edward J. Beattie, Jr. is serving as one of the four volunteers who supervise the Disaster Medical and Nursing Service for the Chicago Chapter, American Red Cross. Dr. Beattie is Chairman of the Chapter's Volunteer Medical and Nursing Committee.

DR. KELLY

DR. KELLY HONORED

Among the seventeen men and women to receive this year's University of Chicago Alumni Citation of Useful Citizen was *Dr. Frank B. Kelly, Sr.* Inaugurated in 1941, the citations are awarded in recognition of "leadership in those civic, social and religious activities that are essential to democracy."

Citations were presented on Alumni Day, June 11, at the University, and the following is an excerpt from the published program:

"Frank B. Kelly, '18, MD'20, Chicago, is a physician in private practice. He is currently clinical professor of medicine at the University of Illinois College of Medicine and, for

A new device for moderate and deep hypothermia in cardiovascular surgery called a "Heat Exchanger" (the tall cylindrically-shaped instrument and attachments shown to the left of the heart-lung machine) has been put into experimental use in the hospital's surgical research laboratory.

Dr. Egbert H. Fell, above, recently demonstrated the use of this device to members of the Gary Levitt Heart Foundation, Inc. (left to right: Mrs. Abe Munson, Mrs. Leo Levitt, Mrs. Marvin Rothman). Funds for the purchase of this "Heat Exchanger," costing approximately \$2300, were generously provided by the Foundation, whose purpose is "aid to cardiac children."

This precision instrument, developed at Duke University, although appearing to be a relatively simple device, can lower and raise body temperature as needed during and after open-heart surgery. In addition, it helps to maintain normal body temperature in some surgical procedures.

By means of the mechanical heart, the patient's blood is circulated, on its way back to the patient, through the "Heat Exchanger's" cylinders. The cylinders are surrounded by a water jacket containing water of a predetermined degree necessary to maintain normal or sub-normal body temperature.

In the near future, Dr. Fell and his surgical team will put this new device into use clinically both at Presbyterian-St. Luke's and at Cook County Children's Hospital.

25 years, was an attending physician in medicine at Cook County Hospital. He is a member of the board of directors and of the executive committee of the health division of the Welfare Council of Metropolitan Chicago. He is a member of the board of governors and chairman of the cardiovascular clinics committee of the Chicago Heart Association. He is president of the board of trustees of Rush Medical College and has served on numerous professional boards responsible for the nation's health. He is a conscientious member of the Alumni Foundation Board and has carried through numerous responsibilities of specific fund raising for the University and for our medical school."

In Miami Beach in June, Drs. Carl Davis, Jr., Geza deTakats, John H. Olwin and Frank V. Theis attended meetings of the International Cardiovascular Society and the American Society for Vascular Surgery; Drs. Theis and Thomas J. Coogan attended the American Therapeutic Society meeting; and Drs. Coogan and Paul H. Holinger attended the American College of Chest Physicians meeting, where Dr. Holinger participated on a panel, "Management of Injuries of the Chest."

Drs. Holinger, Coogan, Robert J. Jensik, Benjamin M. Gasul, Willard L. Wood and Robert W. Carton travelled to Vienna, Austria in August to attend the Sixth International Congress on Diseases of the Chest, held at the University of Vienna. Dr. Jensik presented a paper on "Surgical Treatment of Metastatic Tumors of the Lung"; Dr. Gasul served as a member of a panel on "Cardiovascular Surgery in Congenital Disease," and gave a lecture on "Indications for Cardiac Catheterization in Neonatal Period"; Dr. Carton conducted a Round Table discussion on the subject of "Emphysema"; Dr. Holinger presented a paper on "The Relation Between Laryngeal and Bronchogenic Carcinoma"; and Dr. Coogan participated on a panel discussing "Cardiac Arrhythmias Important to the Chest Surgeon," and in a Fireside Conference on "Rheumatic Heart Disease."

While in Europe, Dr. Holinger went to Padua, Italy to attend the meeting of The Collegium, and Dr. Gasul and Dr. Eugene F. Traut, who also was in Europe at this time, attended the Sixth International Congress of Internal Medicine in Basel, Switzerland. At this Congress, Dr. Traut presented a paper entitled "Tropical Treatment with Antirheumatic Agents" (with Dr. Paul Carstens).

Dr. Carton was in Aspen in early June to attend the Emphysema Conference of the American Thoracic Society.

In late July, Dr. Jensik attended the Adjuvant Chemotherapy Lung Study Executive Committee meeting held at the University of Pennsylvania Hospital in Philadelphia.

Drs. John H. Olwin and Charles B. Puestow recently received Service Certificates for over ten years of consulting service to Veteran patients at Hines Hospital. Dr. Puestow was recently honored by the Chicago Regional Council of Federal Agencies, which presented him with the "Outstanding Professional Employee Award" for 1960.

On the evening of July 27, over radio station WJJD, Dr. Kenneth C. Johnston discussed "Foreign Bodies in the Air and Food Passages." This program was sponsored by the Illinois State Medical Society.

NEW APPOINTMENTS TO MEDICAL STAFF

MAGNUS H. AGUSTSSON, M.D., ADJUNCT, DEPARTMENT OF PEDIATRICS. Associate in Pediatric Cardiology, Cook County Children's Hospital.

ROBERT W. ALEXANDER, M.D., ASSISTANT ATTENDING, DIVISION OF PATHOLOGY. Instructor, University of Illinois, and former Resident, Presbyterian-St. Luke's.

C. CLYDE ANDERSON, M.D., ADJUNCT, DEPARTMENT OF MEDICINE. Instructor, University of Illinois, and Resident, Presbyterian-St. Luke's.

ORVILLE T. BAILEY, M.D., CONSULTING, DIVISION OF PATHOLOGY. Professor of Neurology, University of Illinois.

WILLIAM C. BRENNAN, M.D., ADJUNCT, DEPARTMENT OF GENERAL SURGERY. Former Resident, Presbyterian-St. Luke's.

RICHARD A. BUCKINGHAM, M.D., ASSISTANT ATTENDING, DEPARTMENT OF OTOLARYNGOLOGY AND BRONCHOESOPHAGOGY. Assistant Professor, University of Illinois.

MARIANNE P. BUDZEIKA, M.D., ADJUNCT, DEPARTMENT OF PEDIATRICS. Instructor, University of Illinois, and former Resident, Presbyterian-St. Luke's.

ALFONZO DIAZ, M.D., DEPARTMENT OF GENITO-URINARY SURGERY. Former Resident, Presbyterian-St. Luke's.

PETER J. FARAGO, M.D., ASSISTANT ATTENDING, DEPARTMENT OF MEDICINE. Former Resident, Presbyterian-St. Luke's.

DAVID C. GARRON, PH.D., ASSISTANT ATTENDING PSYCHOLOGIST, DEPARTMENT OF PSYCHIATRY. Formerly United States Public Health Service Fellow in Clinical Psychology, Illinois Neuropsychiatric Institute.

JOHN B. GRIFFIN, M.D., ADJUNCT, DEPARTMENT OF ORTHOPEDIC SURGERY. Clinical Instructor, University of Illinois.

DAVID L. GUTMANN, PH.D., ASSISTANT ATTENDING PSYCHOLOGIST, DEPARTMENT OF PSYCHIATRY. Formerly Post Doctoral Fellow in Clinical Psychology, Psychosomatic and Psychiatric Institute, Michael Reese Hospital.

JAMES A. HUNTER, M.D., ADJUNCT, DEPARTMENT OF GENERAL SURGERY. Instructor, University of Illinois, and former Resident, University of Illinois Hospitals.

FRANK L. HUSSEY, JR., M.D., ADJUNCT, DIVISION OF RADIOLGY AND NUCLEAR MEDICINE. Former Resident, Presbyterian-St. Luke's.

HAROLD A. KAMINETSKY, M.D., ASSISTANT ATTENDING, DEPARTMENT OF OBSTETRICS AND GYNECOLOGY. Assistant Professor, University of Illinois.

FRANCES E. KNOCK, M.D., PH.D., ADJUNCT, DEPARTMENT OF GENERAL SURGERY. Instructor, University of Illinois, and former Resident, Presbyterian-St. Luke's.

FRANCIS L. LEDERER, M.D., CONSULTING, DEPARTMENT OF OTOLARYNGOLOGY AND BRONCHOESOPHAGOGY. Professor and Head of Department of Otolaryngology, University of Illinois.

VICTOR M. LOPRIORE, M.D., ADJUNCT, DEPARTMENT OF PEDIATRICS. Former Resident, Presbyterian-St. Luke's.

JAMES H. MCCLURE, M.D., M.M.Sc., ASSISTANT ATTENDING, DEPARTMENT OF OBSTETRICS AND GYNECOLOGY. Assistant Professor, University of Illinois.

FRANK J. MILLOY, M.D., M.S., ADJUNCT, DEPARTMENT OF GENERAL SURGERY. Instructor, University of Illinois.

A special guest from England, Professor Eric G. L. Bywater of the Post-Graduate Medical School in London, with Dr. Robert M. Kark, attending physician (left) and Dr. James A. Campbell, Chairman, Division of Medicine (right).

Professor Bywater appeared as Guest Lecturer at Presbyterian-St. Luke's Medical Grand Rounds held on June 17 in the A. B. Dick Lecture Room. He spoke on "Juvenile Rheumatism."

ROBERT J. OVERSTREET, M.D., M.S., ADJUNCT, DEPARTMENT OF GENERAL SURGERY. Former Resident, Presbyterian-St. Luke's.

MAX SADOVE, M.D., CONSULTING, DEPARTMENT OF ANESTHESIOLOGY. Professor and Head of Department of Anesthesiology, University of Illinois.

VASIL TRUCHLY, M.D., ASSISTANT ATTENDING, DEPARTMENT OF OBSTETRICS AND GYNECOLOGY. Formerly a Teaching Resident, Presbyterian-St. Luke's.

WILLIAM WALDROP, PH.D., ASSISTANT ATTENDING AUDIOLOGIST, DEPARTMENT OF OTOLARYNGOLOGY AND BRONCHOESOPHAGOGY. Director, Speech and Hearing Clinic, Presbyterian-St. Luke's.

PAUL L. WINTER, M.D., ADJUNCT, DEPARTMENT OF MEDICINE. Instructor, University of Illinois, and Resident, Presbyterian-St. Luke's.

FOUNDATION OFFERS SCHOLARSHIP

A full two-year scholarship to the Presbyterian-St. Luke's Hospital School of Nursing was established this year by the LaSalle Steel Foundation to be awarded to an incoming student from the Calumet Region.

Judith Lynne Soder, of Gary, is the recipient of the Foundation's generosity and, along with 124 other freshman students, will begin her two years of basic nursing education on September 14. During their third year, the Class of 1963 will be salaried nurse interns.

AUXILIARY GIFT TO LIBRARY

A generous gift of \$4,000 has been presented to Presbyterian-St. Luke's by its Medical Staff Auxiliary (doctors' wives) for improved lighting and air-conditioning of Rush Medical Library, one of the country's outstanding medical libraries.

Additional funds for this rehabilitation, which is now completed, were provided from the sale of surplus medical books from the St. Luke's library.

The hospital is grateful to the Auxiliary for its interest in the Library, so vital not only to its own staff but also to doctors, medical students, nurses, technicians and others throughout the entire Medical Center District.

THE HELEN CODY BAKER AWARD

is Presented by

THE WELFARE PUBLIC RELATIONS FORUM

To

PRESBYTERIAN-ST LUKES HOSPITAL

in recognition of its outstanding contribution toward a better understanding of social welfare during the year of 1959 through

A PUBLICATION
SECOND AWARD

Given this 23rd day of JUNE 1960

"REVIEW" AND OTHER PUBLICATIONS WIN AWARDS

At the Annual Meeting of the Welfare Public Relations Forum, an organization sponsored by the Welfare Council of Metropolitan Chicago, Presbyterian-St. Luke's received four "Helen Cody Baker Awards" presented annually by the Forum for outstanding materials and programs of public relations and public education.

Presbyterian-St. Luke's "Review," Intern and Resident Bulletin, and 1959 Year-End Appeal Pamphlet won the second place awards in their respective categories. The 1958-59 Annual Report received a "Class A" award in its category.

The Forum is comprised of representatives of public and private health and welfare agencies in the Chicago Area.

April 22, 1960

A Salute!!!

Superintendent
Presbyterian-St. Luke's Hospital

Dear Sir:

I am a recent "graduate" of your nice hospital via rooms 288 and 514 and the skilled hands of Dr. Gilchrist.

You have made amazing progress since the fourth quarter of 1957. You always had outstanding personnel but now you have also succeeded in getting the gears to mesh so that the necessary - and sometimes cumbersome - machinery is running smoothly.

In thinking of what I might say to reflect my recent very happy experience, I stumbled on an article in the March 19 issue of The Saturday Evening Post, "The Happy Orphans of Metera" - telling of the effects on babies of ever loving care. Here are the closing paragraphs:

One of the most significant observations was made last year by Dr. Richard Blum, the San Francisco psychologist who directed the recent eye-opening survey of malpractice in hospitals and medical groups for the California Medical Association.

"Metera has a meaning far beyond the care of babies," he said. "It could be the answer for all hospitals. Obviously the affection which the Metera nurses give to their babies cannot be applied in the same way to adult patients. But if the Metera spirit could be widely transplanted - if the welfare of the patient truly came first, if the nurses and the doctors and the whole hospital staff truly felt and demonstrated that they liked and respected their patients - then most of the troubles of modern hospitals would vanish."

The underscored lines are a good summary of the care and service I received between March 9 and April 2.

For an adult patient (I am 72) one hesitates to speak of Loving care and yet in my opinion, that is exactly what I received, particularly at the hands of the grand team on the 5th floor. The 2nd floor group was equally nice but I was in 288 a shorter time. Also my stay in 514 was post-operative.

I shall not attempt to single out individuals because I might omit someone. Actually on the 5th floor it seems like team effort and the spirit includes practically all.

And so, a salute to the personnel who give of themselves beyond the normally expected services. I should include your house doctors such as Drs. Patton, Faber and Krock.

Also a salute to your diet kitchen. Your nurses and others should have been dealing with well fed and happy patients. The food is marvelous and I would call this an expert opinion.

This was intended as a short note but perhaps your day can always be extended enough to allow time for pleasant reading.

My best to you and the entire organization.

Sincerely,

Frank M. Willis

May 19, 1960

Dear Mr. Brady:

I sincerely wish to thank you and your complete staff in making my stay at Presbyterian-St. Luke's Hospital one to be remembered as the most humane, courteous, cooperative and unique in every manner.

I am from New York and due to my illness I have been a patient in most of the hospitals there and expected all to be alike but to my amazement you people have accomplished a relationship with a patient not as a case number but as a person and that in itself is better medicine than one can possibly prescribe.

I am a mother of two children and most anxious to be home with them but because of the care and consideration I am receiving, my husband and I are taking everything in its stride.

Thank you for allowing me this opportunity in expressing my gratitude to you and your staff.

Sincerely,

Lila Hyman
Room 413

Student Nurses baby-sit in second floor lounge of School of Nursing while children's parents—new interns and residents and their wives—attend a Buffet Supper in the School's recreation room.

The Buffet Supper, to honor the new House Staff, was given by the Medical Staff Auxiliary (doctors' wives) on July 8. In addition to the honored guests, over 100 attended the party including members of the Medical Staff, their wives, and hospital administration.

The Auxiliary put in long hours of preparation and planning and their efforts resulted in a most successful party.

NEWS BRIEFS

Michael Lukecart, official mascot of Task Force XXI, Marine Reserve Air-Ground Unit, salutes Col. Douglas J. Peacher, Commander of the Task Force and a Sears Roebuck merchandising executive, as Michael's parents, Mr. and Mrs. Gene Lukecart of Wyoming, Illinois look on.

On July 12, Col. Peacher came to Presbyterian-St. Luke's to confer upon Michael, age 11, his appointment as the Task Force's official mascot.

He brought Michael the Marine soldiers, the Marine Corps Color Guard, and Marine dungaree cap. He told Michael how the Task Force would maneuver on the California desert this summer and invited him to help Task Force XXI honor the Marines, who fought on Guadalcanal, at a Memorial Service on August 8.

On the morning of July 13, Michael underwent open-heart surgery. He is doing fine and now is back in Wyoming well on the road to recovery.

MR. DURBIN

NEWLY CREATED POSITION FILLED

Norman A. Brady, Director, has appointed Richard L. Durbin as Director of Out-Patient Services, a newly created position in the Presbyterian-St. Luke's organization.

Mr. Durbin, who assumed his duties on July 1, comes to Chicago from Memphis, Tennessee, where he served for four years as Associate Administrator of the City of Memphis Hospitals.

A native of Columbus, Ohio, he graduated from Ohio State University and, after serving as a Navy Lieutenant in World War II and the Korean War, entered the University of Chicago's Course in Hospital Administration and received his Masters in Business Administration in 1956. He took his administrative residency at the Gary Methodist Hospital, and is a member of the American College of Hospital Administrators.

Mr. Durbin's responsibilities will include a study of the hospital's clinic facilities with particular reference to the best care of patients from all economic levels in a growing community. The Out-Patient Department is expected to play an even more important role in the recently announced "10-Year Plan" to give Presbyterian-St. Luke's national stature as a university-affiliated medical center.

Mr. Durbin, who is 32, and his family live in Oak Park.
